Domains of Truth Lambert Zuidervaart,2023-03-10 Truth is in trouble In response this book presents a new conception of
truth It recognizes that prominent philosophers have questioned whether the idea of truth is important Some have asked why
we even need it Their questions reinforce broader trends in Western society where many wonder whether or why we should
pursue truth Indeed some pundits say we have become a post truth society Yet there are good reasons not to embrace the
cultural Zeitgeist or go with the philosophical flow reasons to regard truth as a substantive and socially significant idea This
book explains why First it argues that propositional truth is only one kind of truth an important kind but not all important
Then it shows how propositional truth belongs to the more comprehensive process of truth as a whole This process is a
dynamic correlation between human fidelity to societal principles and a life giving disclosure of society The correlation comes
to expression in distinct social domains of truth where either propositional or nonpropositional truth is primary The final
chapters lay out five such domains science politics art religion and philosophy Anyone who cares about the future of truth in
society will want to read this pathbreaking book *The American Catalogue* ,1908 **The Academy and Literature** ,1902
