Chapter 1

The Antamina Mine in Peru

- 1 The ore is valuable and in demand so even though transport costs will be high the mine should still be profitable.
- 2 Rainfall and melting snow will dissolve some minerals. Sediments and dissolved minerals will move down the mountainsides and collect in the valleys. This water will be toxic to many organisms and will flow away from the mine.
- 3
 - a Further deposits have been found and the productive life of the mine has been extended by many years.
 - b It is too difficult to cover bare rock on steep slopes. The exposed rock will weather over time and may release less harmful substances. The location is so remote that the visual scar on the landscape will not be seen.

Chapter 2

Biofuels: the future of fuels or a misguided technology?

- 1 Bioethanol will mean the country is not dependent on supplies from other countries, reducing risk if there is political conflict, global price rises, a shortage of global supply. It may also be a crop with a value if exported.
- 2 It's a renewable source of energy. Fairly low technology. Different crops are suited to different regions. Absorbs carbon dioxide.
- 3 Bioethanol crops might be better suited to their land. The crop might be more profitable than food crops.

A house that needs no energy. Is it possible?

- 1 The house will only use 10% of the standard house's energy ($1.5 \text{ dm}^2 \text{ m}^{-2}$, rather than 150 dm^2).

- 2 So few houses have been built in this style because:
 - it is new technology
 - not many people have the skills to build them yet
 - they are very expensive to build
 - the savings made do not outweigh the costs of building.
- 3 There will always be some energy loss, and the use of solar panels, etc., is only effective in certain weather conditions.

Chapter 3

The impact of wind erosion

- 1
 - Unexpected drought over a number of years.
 - Soil particles were light (less water) so more easily blown about.
 - Large areas ploughed up, few windbreaks.
 - Cultivating the soil broke it up into smaller sized components.
 - Deep-rooted grasses no longer there to hold the soil.
- 2 Farmers had bought the land and wanted to grow crops to make a profit from their investment. No central control as to what was grown (and how)
- 3
 - Starvation
 - Need for large quantities of people to relocate
 - Loss of jobs
 - Impact on local ecosystem: limited topsoil, few plants, and associated impact on food web.
- 4 It prevented the land from being used for arable production and allowed it to return to grassland.

Flower power

- 1
 - a This is a (large-scale) commercial arable farm: the bulbs are being sold for profit rather than food (commercial) and there are no animals involved in the production (arable).
 - b (From Figure 3.18) There is a lack of windbreaks to slow the wind speed down. The area is very flat. (From the text) There is a large amount of organic matter that is easily blown away when dry.

Question Time at the ICJ in Contentious Cases Karel Wellens, 2025-08-12 This book written from a practice oriented perspective examines whether and how questioning from the Bench actually achieves its objective i e to assist the Court Particular circumstances such as incidental proceedings and the time factor have an impact on the act of questioning while the provisional relevance of issues raised perceived as such by both the Court and the parties may later turn out to be effective and rather important Judicial actors have raised both conceptual and contextual questions as well as procedural and substantive and even hypothetical ones The subject matter of questions depends on the Court s champ op ratoire while the parties litigation strategy and their co operational duties provide the framework to respond to the Court and to comment on the other party s replies A survey of this practice by both the judicial actors and the parties well established now after almost eight decades constitutes the groundwork for the qualitative analysis of the manner in which questions replies and comments have found their way into the judicial reasoning of the Court and of individual judges In the

overwhelming majority of judgments and individual opinions this judicial engagement has been co decisive This is the first in depth and comprehensive monograph providing a functional analysis of this managerial tool at the Court s disposal making it essential reading for both scholars and practitioners studying and involved with the Court s jurisprudence Karel Wellens is Emeritus Professor of International Law at the Radboud University Nijmegen in The Netherlands *The Function of Public International Law* Jan Anne Vos,2013-02-26 This book addresses fundamental aspects of the concept of public international law in both theory and practice The argument developed by the author is that underlying the traditional horizontal structure of public international law a vertical structure of the concept of law may be discerned This vertical structure is seen unfolding into two mutually exclusive frameworks a framework of obligation accounting for obligations and a framework of authorization accounting for rights The problem then arising is that a concept of public international law which only admits either rights or obligations cannot be regarded as coherent The author however takes and substantiates the position that coherence can be achieved by suppressing the mutual exclusivity of both frameworks This move paves the way to formulating the function of public international law in terms of the constituting of international society Since in public international law the theoretical aspects profoundly affect practice this book is not only of interest to academics but also for practitioners such as officials of foreign offices and international institutions

Basic Topics in Public International Amos O Enabulele,Bright Bazuaye,2025-03-06 This book stands out as a remarkable work of thought provoking scholarship reflecting the formidable academic prowess of its authors renowned law scholars and professors at the University of Benin Their deep expertise is evident as they explore foundational topics in international law which serve as a gateway to understanding its evolving complexities The book breaks down intricate concepts making them accessible and practical It promises to be an invaluable resource for students practitioners scholars and policymakers alike offering insightful guidance on core principles and contemporary issues in international law What sets this book apart is the insightful approach taken by its two distinguished authors Instead of merely explaining international law concepts in abstract or from a Eurocentric lens they skillfully frame their discussion around how international law responds to the unique circumstances of the African Continent This perceptive method offers a more comprehensive understanding of the law s application in diverse contexts Two examples in particular stand out to illustrate this nuanced and regionally relevant perspective First the authors provide a dynamic analysis of *uti possidetis juris* diving deep into its origins and implications They explore how this principle rooted in colonial era boundaries that ignored the cultural social and religious fabric of local populations has fueled many of the ethno religious conflicts that continue to afflict post independence Africa Their discussion sheds light on how these artificially imposed borders have sowed discord leading to armed crises across the continent and

make a compelling case for a re-evaluation of this concept in light of Africa's unique history and needs. The second is in chapter Thirteen where the authors sharply critique how international law scholars and policymakers often overlook the devastating impact of the slave trade and colonialism on Africa. They are particularly struck by the contrast between the ongoing discussions and reparations for World War II atrocities and the relative silence on the injustices of colonialism and slavery. The book engages a broad audience—students, legal practitioners, scholars, and policymakers—by encouraging a more inclusive narrative that acknowledges these historical wrongs and their lasting effects. This book serves students by simplifying complex international law concepts using familiar examples and clear explanations, making the subject accessible. For practitioners and scholars, it offers bold, thought-provoking arguments that challenge established views. For instance, in Chapter Three, the authors critically analysed the interaction between Nigerian and international law, particularly focusing on the Court of Appeal and Supreme Court's handling of *Abacha v Fawehinmi* (2001) 1 NWLR Pt 662 228. They persuasively argue for overturning the legal precedent set by this case. Though the call to reconsider established legal precedents may seem unconventional, it effectively challenges readers to reevaluate the judgment in the light of the authors' persuasive arguments. Notably, the book delves into the International Court of Justice's decision in *Land and Maritime Boundary between Cameroon and Nigeria* (Cameroon v Nigeria Equatorial Guinea Intervening) (ICJ Rep 2002 303). The authors highlight how the judgment was executed without recourse to article 12(1) of the Nigerian Constitution. Their observation, particularly around why the constitution should have been amended to excise the affected territories from the constitutionally recognised territories of Nigeria, invites a deeper reflection on the relationship between Nigerian law and international law. It is instructive that the difficulties which the authors envisaged in the previous edition of this work, for and for which they strongly called for a reconsideration of *Abacha v Fawehinmi*, became a reality in the recent case of *Nnamdi v FRN* (SC CR 1361 2022) of 15 December 2023. In the case, the Supreme Court had to wriggle its way out of the constraining effect of the *Abacha* decision on the hierarchy of implementing pieces of legislation vis-à-vis other Statutes of the National Assembly. To policymakers across Africa, whether at the national level within the African Union or across various sub-regional legal frameworks, this book presents a compelling critique of the current fragmented approach to integration. It highlights the complex, dual nature of the African Charter on Human and Peoples Rights as both national and international law, resulting in inconsistencies in interpretation and application. The authors expressed concerns over the lack of a unified approach, revealing gaps between national and international courts and urging policymakers to bridge these divides for more effective implementation. The authors' focus on the Economic Community of West African States is remarkable. I am yet to see any text on public international law that gives so much attention to Africa, ECOWAS, and Nigeria as did this book. In all, the authors did not shy away from highlighting problems and suggesting solutions. Confident in their substantial contribution to the field, the authors navigate this book with remarkable assurance and scholarly rigor. Their work stands out as an exceptional addition to the

study of international law With its depth of insight and thought provoking analysis this book is not just informative but transformative challenging readers to rethink established perspectives I wholeheartedly recommend this work to students practitioners scholars and anyone interested in a deeper understanding of international law
