matter is surrounded by conditions over which few of us have any control certainly we can develop a point of view and do some organized thinking which might come to a practical end It is with that in mind that we now announce the project we have called The Case Study House Program The magazine has undertaken to supply an answer insofar as it is possible to correlate the facts and point them in the direction of an end result We are within the limits of uncontrollable factors proposing to begin immediately the study planning actual design and construction of eight houses each to fulfil the specifications of a special living problem in the Southern California area Eight nationally known architects chosen not only for their obvious talents but for their ability to evaluate realistically housing in terms of need have been commissioned to take a plot of God's green earth and create good living conditions for eight American families They will be free to choose or reject on a merit basis the products of national manufacturers offering either old or new materials considered best for the purpose by each architect in his attempt to create contemporary dwelling units We are quite aware that the meaning of contemporary changes by the minute and it is conceivable that each architect might wish to change his idea or a part of his idea when time for actual building arrives In that case he will within reason be permitted to do so Incidentally the eight men have been chosen for among other things reasonableness which they have consistently maintained at a very high level
