Attending Daedalus:

Attending Daedalus Peter Wright, 2003-01-01 This new study of the fiction of Gene Wolfe one of the most influential contemporary American science fiction writers offers a major reinterpretation of Gene Wolfe's four volume *The Book of the New Sun* and its sequel *The Urth of the New Sun* After exposing the concealed story at the heart of Wolfe's magnum opus Wright adopts a variety of approaches to establish that Wolfe is the designer of an intricate textual labyrinth intended to extend his thematic preoccupations with subjectivity the unreliability of memory the manipulation of individuals by social and political systems and the psychological potency of myth faith and symbolism into the reading experience

[British Science Fiction Film and Television](#) Tobias Hochscherf, James Leggott, Donald E. Palumbo, 2014-01-10 Written by international experts from a range of disciplines these essays examine the uniquely British contribution to science fiction film and television Viewing British SF as a cultural phenomenon that challenges straightforward definitions of genre nationhood authorship and media the editors provide a conceptual introduction placing the essays within their critical context Essay topics include Hammer science fiction films the various incarnations of Doctor Who Stanley Kubrick's *A Clockwork Orange* and such 21st

century productions as *28 Days Later* and *Torchwood* [Gothic Science Fiction 1980-2010](#) Sara Wasson, Emily Alder, 2011-01-01 Gothic fiction's focus on the irrational and supernatural would seem to conflict with science fiction's rational foundations. However, as this novel collection demonstrates, the two categories often intersect in rich and revealing ways. Analyzing a range of works including literature, film, graphic novels, and trading card games from the past three decades through the lens of this hybrid genre, this volume examines their engagement with the era's dramatic changes in communication technology, medical science, and personal and global politics.

[Citizen Science Fiction](#) Jerome Winter, 2021-03-19 *Citizen Science Fiction* draws on an interdisciplinary swath of literature and media to make the case that the science fiction genre can help rethink the pedagogical use of citizen science as a tool to interrogate our collective civic engagement with science and the incorporation of science into a rigorous, exciting, writing-based curriculum. The book revolves around recent developments in specific scientific disciplines including biology, ecology, computer science, astronomy, and cognitive science. Winter closely studies a range of science fiction texts and tropes such as aliens, robots, clones, mind uploads, galactic empires, for what they have to contribute to the ongoing scholarly discussion on psychological mindset and mindful argument, reading for probing inquiry and productive uncertainty in the age of the Anthropocene, reading for voice with a view to our digitally dominated future, and reading for threshold concepts in a scientifically driven society.

We often think of these as emerging from novel reading, film viewing, or video game playing; rarely do we consider the worlds of analog games such as *Dungeons and Dragons*.
