**The Story of Modern Skiing** John Fry, 2017-03-14 This is the definitive history of the sport that has exhilarated and infatuated about 30 million Americans and Canadians over the course of the last fifty years. Consummate insider John Fry chronicles the rise of a ski culture and every aspect of the sport's development including the emergence of the mega resort and advances in equipment, technique, instruction, and competition. The Story of Modern Skiing is laced with revelations from the author's personal relationships with skiing greats such as triple Olympic gold medalists Toni Sailer and Jean Claude Killy, double gold medalist and environmental champion Andrea Mead Lawrence, first women's World Cup winner Nancy Greene, World Alpine champion Billy Kidd, Sarajevo gold and silver medalists Phil and Steve Mahre, and industry pioneers such as Vail founder Pete Seibert, metal ski designer Howard Head, and plastic boot inventor Bob Lange. Fry writes authoritatively of alpine skiing in North America and Europe, of Nordic skiing, and of newer variations in the sport: freestyle skiing, snowboarding, and extreme skiing. He looks closely at skiing's relationship to the environment, its portrayal in the media, and its response to social and economic change. Maps, locating major resorts, records of ski champions, and a timeline, bibliography, glossary, and index of names and places make this the definitive work on modern skiing. Skiers of all ages and abilities will revel in this lively tale of their sport's heritage.

**Skiing into Modernity** Andrew Denning, 2014-11-26 Skiing into Modernity is the story of how skiing moved from Europe's Scandinavian periphery to the mountains of central Europe where it came to define the modern Alps and set the standard for skiing across the world. Denning offers a fresh, sophisticated, and engaging cultural and environmental history of skiing that alters our understanding of the sport and reveals how leisure practices evolve in unison with our changing relationship to nature. Denning probes the modernist self-definition of Alpine skiers and the sport's historical appeal for individuals who sought to escape city strictures while achieving mastery of mountain environments through technology and speed, two central features distinguishing early twentieth-century cultures. Skiing into Modernity surpasses existing literature on the history of skiing to explore intersections between work, tourism, leisure, development, environmental destruction, urbanism, and more.

**Be Fit to Ski** S. Kramer MS, 2015-04-16 Every winter, world-class racers schuss down race courses at speeds upwards of 80 mph, going all out for 2 minutes of racing. Die-hard recreational skiers spend weekends exhausting themselves to catch that last chair lift ride. Professional ski instructors devote their free time to honing skills in technique and tactics to meet specific national standards. Regardless of the number of days spent on snow, all participate in a sport that demands a balanced combination of peak conditioning in targeted fitness areas called performance abilities: endurance, strength, power, speed, and agility. As part of a thesis for the completion of a Masters degree in kinesiology, *Be Fit to Ski* incorporates over 30 years of research on alpine skiing and athletic training toward the development of a year-round fitness program. The idea of periodization, a block training approach using microcycles and macrocycles, forms the basis of four training phases that begin in the spring and culminate with the end of the ski season.

Divided into three sections Basics of Training Performance Abilities and The Training Year this book provides all the necessary answers to develop year round fitness training for skiing that will result in quicker skill improvement and guaranteed more vertical per day

**The Fall Line** Ralph Waldo Emerson, Nathaniel Vinton, 2015-01-15. Great sports writing. Vinton is taking us inside a world few ever visit. James Hill, Washington Post. Harnessing nature's most powerful forces, elite downhillers descend icy, rugged slopes at speeds cresting 90 miles per hour. For decades, American skiers struggled to match their European counterparts, and until this century, the US Ski Team could not claim a lasting foothold on the roof of the Alps, where the sport's legends are born. Then came a fledgling class of American racers that disrupted the Alpine racing world order. Led by Bode Miller and Lindsey Vonn, Julia Mancuso and Ted Ligety, this band of iconoclasts made a place for their country on some of the world's most prestigious race courses. Even as new technology amplified the sport's inherent danger, the US Ski Team learned how to win, and they changed downhill racing forever. *The Fall Line* is the story of how it all came together, a deeply reported reconstruction of skiing's most dramatic season. Drawing on more than a decade of research and candid interviews with some of the sport's most elusive figures, award-winning journalist Nathaniel Vinton reveals the untold story of how skiers like Vonn and Miller and their peers and rivals fought for supremacy at the Olympic Winter Games. Here is an authoritative portrait of a group of men and women taking mortal risks in a bid for sporting glory. A white-knuckled tour through skiing's deep traditions and least accessible locales, *The Fall Line* opens up the sexy, high-stakes world of downhill skiing: its career-ending crashes, million-dollar sponsorship deals, international intrigue, and showdowns with nature itself. With views from the starting gate, the finish line, and treacherous turns in between, *The Fall Line* delivers the adrenaline of one of the world's most beautiful and perilous sports, alongside a panoramic view of skiing's past, present, and future.
