Gordon G. Globus

Alter Universe:

Quantum Closures and Disclosures Gordon G. Globus, 2003-04-28 Quantum Closures and Disclosures thinks together two seemingly irreconcilable discourses An application of quantum field theory to brain functioning called quantum brain dynamics and the continental postphenomenological tradition especially the work of Martin Heidegger and Jacques Derrida Underlying both developments is a new ontology of nonCartesian dual modes whose rich provenance is their between World is disclosed in the lumen naturale of dual modes belonging together in their between all presencing is a function of a conjugate form of match in the between This surprising rapprochement between a powerful tradition within continental philosophy and the 20th century quantum revolution in science is fruitfully applied to crucial issues in philosophy brain science mathematics and psychiatry Related Titles Quantum Brain Dynamics and Consciousness An introduction edited by Mari Jibu and Kunio Yasue 1995 and My Double Unveiled The dissipative quantum model of the brain by Giuseppe Vitiello 2001

Brain and Being Gordon G. Globus, Karl H. Pribram, Giuseppe Vitiello, 2004-09-17 This book results from a group meeting held at the Institute for Scientific Exchange in Torino Italy The central aim was for scientists to think together in new ways with those in the humanities inspired by quantum theory and especially quantum brain theory These fields of inquiry have suffered conceptual estrangement but now are ripe for rapprochement if academic parochialism is put aside A prevalent theme of the book is a moving away from individual elements and individual actors acting upon each other toward a coordinate hermeneutic dynamics that manifests as a coherent totality Among the topics covered are image in photography and in neuroscience language time brain and mathematics quantum brain dynamics and quantum communication
