Handbook of Marriage and the Family Suzanne K. Steinmetz, Marvin B. Sussman, 2013-11-11 The lucid straightforward Preface of this Handbook by the two editors and the comprehensive perspectives offered in the Introduction by one of them leave little for a Foreword to add It is therefore limited to two relevant but not intrinsically related points vis a vis research on marriage and the family in the interval since the first Handbook Christensen 1964 appeared namely the impact on this research of the politicization of the New Right and of the Feminist Enlightenment beginning in the mid sixties about the time of the first Handbook In the late 1930s Willard Waller noted Fifty years or more ago about 1890 most people had the greatest respect for the institution called the family and wished to learn nothing whatever about it Everything that concerned the life of men and women and their children was shrouded from the light Today much of that has been changed Gone is the concealment of the way in which life begins gone the irrational sanctity of the home The aura of sentiment which once protected the family from discussion clings to it no more We want to learn as much about it as we can and to understand it as thoroughly as possible for there is a rising recognition in America that vast numbers of its families are sick from internal frustrations and from external buffeting We are engaged in the process of reconstructing our family institutions through criticism and discussion 1938 pp 3 4

Waite,1986 Young adults in recent cohorts have been leaving the parental home earlier and marrying later now than they did several decades ago resulting in an increased period of independent living This Note originally published in American Sociological Review v 51 no 4 August 1986 explores the consequences of time spent in nonfamily living using data from the National Longitudinal Surveys of Young Men and Young Women The authors expect that experience in living away from home prior to marriage will cause young adults to change their attitudes values plans and expectations and move them away from a traditional family orientation They find strong support for this hypothesis for young women those who lived independently became more likely to plan for employment lowered their expected family size became more accepting of employment of mothers and more nontraditional on sex roles in the family than those who lived with their parents Non family living had much weaker effects on young men in the few tests that could be performed for them The Note also addresses the conditions under which living away increases individualism and discusses the implications of these findings
