Construction Toys and Modern European Culture Artemis Yagou, 2025-12-08 This innovative take on construction toys explores the development and use of building inspired playthings between 1830 and 1940 as they became the educational toys par excellence for industrialised and industrialising societies in Europe and elsewhere Playful and instructive at the same time and sitting at the intersection of leisure learning and technology construction toys exemplified directed purposeful play Both commercially oriented and avant garde producers attempted to shape children through these objects by instilling a range of skills particularly patience discipline and a sense of order By acquiring and employing such toys for their children middle class families attempted to come to terms with the contradictions of modernity the demands of new technologies and the fear resulting from their relentless advance This book uses objects from museum collections and rich textual sources as a starting point for examining these themes with special emphasis on neglected or controversial areas such as political and nationalist aspects of play negative emotions during play and the perspective of children Since play is the core subject this book will appeal to very broad specialist and non specialist audiences

*Toys, Consumption, and Middle-class Childhood in Imperial Germany, 1871-1918* Bryan Ganaway, 2009 Drawing on a variety of techniques from history anthropology and literary criticism the author argues toy consumption helped adults negotiate the transmission of middle class values regarding modernity technology gender roles and nationalism to their children Practices of consumption permitted self fashioning from above and below women used their control over childhood to insert themselves into political debates about the future shape of the nation at a time when they lacked the vote Although the project to build a middle class utopia via shopping never succeeded millions of Germans happily bought toys at Christmas and birthdays showing their faith in the ability of modern society to make the world a better place To understand why ordinary consumers made these choices the book draws on a variety of sources including periodicals trade journals advertisements pedagogical literature memoirs and toys

**The Play World** Patricia Anne Simpson, 2020-09-21 The

Play World chronicles the history and evolution of the concept of play as a universal part of childhood Examining texts and toys coming out of Europe between 1631 and 1914 Patricia Anne Simpson argues that German material literary and pedagogical cultures were central to the construction of the modern ideas and realities of play and childhood in the transatlantic world With attention to the details of toy manufacturing and marketing Simpson considers prescriptive texts about how children should play treat their possessions and experience adventure in the scientific exploration of distant geographies She illuminates the role of toys among them a mechanical guillotine yo yos hybridized dolls and circus figures as agents of history Using an interdisciplinary approach that draws from postcolonial childhood and migration studies she makes the case that these texts and toys transfer the world of play into a space in which model childhoods are imagined and enacted as German With chapters on the Protestant play ethic enlightened parenting Goethe as an advocate of play colonial fantasies children s almanacs ethnographic play and an empire of toys Simpson s argument follows a compelling path toward understanding the reproduction of religious gendered ethnic racial national and imperial identities emanating from German speaking Europe that collectively construct a global imaginary This foundational and deeply original study connects German speaking communities across the Atlantic as they collectively engender the epistemology of the play world It will be of particular interest to German studies scholars whose research crosses the Atlantic
