Amalgamations Fusing Technology And Culture:

Amalgamations Susanne Lundin, Lynn Åkesson, 1999 Contains seven essays on the amalgamation of technology and culture including the amalgamations of technology and culture technology and everyday life hidden stories of hearing aids modern genetics and the alien inside and biotechnology and the reinterpretation of nature **New Directions in**

Anthropological Kinship Linda Stone, 2002-05-30 Following periods of intense debate and eventual demise kinship studies is now seeing a revival in anthropology New Directions in Anthropological Kinship captures these recent trends and explores new avenues of inquiry in this re emerging subfield The book comprises contributions from primatology evolutionary anthropology archaeology and cultural anthropology The authors review the history of kinship in anthropology and its theory and recent research in relation to new directions of anthropological study Moving beyond the contentious debates of the past the book covers feminist anthropology on kinship the expansion of kinship into the areas of new reproductive technologies recent kinship constructions in EuroAmerican societies and the role of kinship in state politics *Mundania* Robert

Willim, 2024-01-24 Digital services platforms and arrangements are often promoted as smooth and convenient smart or intelligent When introduced devices can appear utterly fascinating or awkward even disquieting Eventually however they soon disappear in the muddle of everyday life This is how Mundania takes form Based on original research this book uses the concept of mundania to better understand technological change Scholar artist Robert Willim deftly unpacks the interplay between everyday life and the immense complexity of technological infrastructures Offering imaginative new insights into our relationship with technology this book will appeal to readers in a range of fields from science and technology studies and media studies to the arts The Atomized Body Max Liljefors, Susanne Lundin, Andréa Wiszmeg, 2015-02-01 Referring to the

focus of the biosciences on molecular particles of the human biology such as stem cells genes and neurons this account examines the relationships between culture society and bioscientific research Showing that the atomized body is indeed socially and culturally embedded in plural and complex ways it argues that biomedicine and biotechnology do not only intersect with the human body but also reshape our perceptions of selfhood and life From a multidisciplinary perspective this volume explores the biosciences and the atomized body in their social cultural and philosophical contexts *Nameless*

Relations Monica Konrad, 2005 Based on the author's fieldwork at assisted conception clinics in England in the mid 1990s this is the first ethnographic study of the new procreative practices of anonymous ova and embryo donation Giving voice to both groups of women participating in the demanding donation experience the donors on the one side and the ever hopeful IVF recipients on the other Konrad shows how one dimension of the new reproductive technologies involves an unfamiliar relatedness between nameless and untraceable procreative strangers Offsetting informants local narratives against traditional Western folk models of the sexed reproductive body the book challenges some of the basic assumptions underlying conventional biomedical discourse of altruistic donation that clinicians and others promote as gifts of life It brings

together a wide variety of literatures from social anthropology social theory cultural studies of science and technology and feminist bioethics to discuss the relationship between recent developments in biotechnology and changing conceptions of personal origins genealogy kinship biological ownership and notions of bodily integrity Technogenic Turns Bahiyiyih D.
