Barges and Capitalism Jan De Vries,1981 *Barges and Capitalism* Jan De Vries,1978 *Barges and Capitalism* Jan Vries (historicus),1978 *Peat and the Duth Golden Age* J. W. de Zeeuw,Jan De Vries,1978 *Peat and the Dutch Golden Age* J. W. de Zeeuw,1978 **Landscape and Power, Second Edition** William John Thomas Mitchell,W. J. T. Mitchell,2002-04-15 This text considers landscape not simply as an object to be seen or a text to be read but as an instrument of cultural force a central tool in the creation of national and social identities This edition adds a new preface and five new essays **Basic Concepts for Simple and Complex Liquids** Jean-Louis Barrat,Jean-Pierre Hansen,2003-03-27 Presenting a unified approach this book focusses on the concepts and theoretical methods that are necessary for an understanding of the physics and chemistry of the fluid state The authors do not attempt to cover the whole field in an encyclopedic manner Instead important ideas are presented in a concise and rigorous style and illustrated with examples from both simple molecular liquids and more complex soft condensed matter systems such as polymers colloids and liquid crystals

Myrica Jozef IJsewijn,2000 **The Birth of Modern Europe** ,2010-12-07 It seems undeniable that Jan de Vries has cast an indelible impression upon the field of early modern economic history With his rejection of traditional models that left pre industrial Europe with little to no role to play in modern development de Vries work has laid claim to the rich significance of the early modern period as the birth of the contemporary West Culminating in *The Industrious Revolution Consumer Behavior and the Household Economy 1650 to the Present* 2008 his work has changed the way scholars conceptualize and study this dynamic period as the contributors in this volume attest Utilizing the methods and concepts pioneered by de Vries these authors display the depth and breadth of his influence with applications ranging from trade to architecture from the Netherlands to China and from the 1400s to the present day *The Frigid Golden Age* Dagomar Degroot,2018-02-08 Dagomar Degroot offers the first detailed analysis of how a society thrived amid the Little Ice Age a period of climatic cooling that reached its chilliest point between the sixteenth and eighteenth centuries The precocious economy unusual environment and dynamic intellectual culture of the Dutch Republic in its seventeenth century Golden Age allowed it to thrive as neighboring societies unraveled in the face of extremes in temperature and precipitation By tracing the occasionally counterintuitive manifestations of climate change from global to local scales Degroot finds that the Little Ice Age presented not only challenges for Dutch citizens but also opportunities that they aggressively exploited in conducting commerce waging war and creating culture The overall success of their Republic in coping with climate change offers lessons that we would be wise to heed today as we confront the growing crisis of global warming *Beyond the Grand Tour* Rosemary Sweet,Gerrit Verhoeven,Sarah Goldsmith,2017-02-17 Travel in early modern Europe is frequently represented as synonymous with the institution of the Grand Tour a journey undertaken by elite young males from northern Europe to the centres of the arts and antiquity in Italy Taking a somewhat different perspective this volume builds upon recent research that pushes beyond this

narrow orthodoxy and which decentres Italy as the ultimate destination of European travellers. Instead it explores a much broader pattern of travel undertaken by people of varied backgrounds and with divergent motives for travelling. By tapping into current reactions against the reification of the Grand Tour as a unique and distinctive practice, this volume represents an important contribution to the ongoing process of resituating the Grand Tour as part of a wider context of travel and topographical writing. Focusing upon practices of travel in northern and western Europe rather than in Italy particularly in Britain, the Low Countries and Germany, the essays in this collection highlight how itineraries continually evolved in response to changing political, economic and intellectual contexts. In so doing, the reasons for travel in northern Europe are subjected to a similar level of detailed analysis as has previously only been directed on Italy. By doing this, the volume demonstrates the variety of travel experiences including the many shorter journeys made for pleasure, health, education and business undertaken by travellers of varying age and background across the period. In this way, the volume brings to the fore the experiences of varied categories of traveller from children to businessmen which have traditionally been largely invisible in the historiography of travel.
