Issues in the Developmental Approach to Mental Retardation Robert M. Hodapp, Jacob A. Burack, Edward Zigler, 1995-01-27

Issues in the Developmental Approach to Mental Retardation is one of the first books exclusively devoted to applying the theories findings and approaches used in work with nonretarded children to several types of retarded individuals The editors and contributors define the developmental approach and explore theoretical issues as they relate to retarded populations Problems involving similar sequences of development cross domain relations the environment and motivation are all discussed as is the importance of separating the various etiological groups for research and intervention purposes The contributors also examine the nature of development in specific etiological groups types of retardation that are addressed include cultural familial retardation Down syndrome fragile X syndrome autism and children with sensory and motor handicaps This significant volume demonstrates how data from nonretarded development can inform work with retarded populations and how findings from children with mental retardation enrich developmental theory

For some time now the study of cognitive development has been far and away the most active discipline within developmental psychology Although there would be much disagreement as to the exact proportion of papers published in developmental journals that could be considered cognitive 50% seems like a conservative estimate Hence a series of scholarly books devoted to work in cognitive development is especially appropriate at this time The Springer Series in Cognitive Development contains two basic types of books namely edited collections of original chapters by several authors and original volumes written by one author or a small group of authors The flagship for the Springer Series is a serial publication of the advances type carrying the subtitle Progress in Cognitive Development Research Each volume in the Progress sequence is strongly thematic in that it is limited to some well defined domain of cognitive developmental research e g logical and mathematical development development of learning All Progress volumes will be edited collections Editors of such collections upon consultation with the Series Editor may elect to have their books published either as contributions to the Progress sequence or as separate volumes All books written by one author or a small group of authors are being published as separate volumes within the series
