Christianization and the Rise of Christian Monarchy Nora Berend, 2007-11-22 This 2007 text is a comparative analysis of one of the most fundamental stages in the formation of Europe. Leading scholars explore the role of the spread of Christianity and the formation of new principalities in the birth of Denmark, Norway, Sweden, Bohemia, Hungary, Poland, and Russia around the year 1000. Drawing on history, archaeology, and art history and emphasizing problems related to the sources and historiographical debates, they demonstrate the complex interdependence between the processes of religious and political change covering conditions prior to the introduction of Christianity, the adoption of Christianity, and the development of the ruler's power. Regional patterns emerge, highlighting both the similarities in ruler-sponsored cases of Christianization and differences in the consolidation of power and in institutions introduced by Christianity. The essays reveal how local societies adopted Christianity, medieval ideas of what constituted the dividing line between Christians and non-Christians, and the connections between Christianity and power.

A History of Christian Conversion David W. Kling, 2020-05-05 In this first in-depth and wide-ranging history of Christian conversion, David Kling examines the dynamic of turning to the Christian faith by individuals, families, and people groups. Global in reach and engaging recent methods and theories in conversion studies, the narrative progresses from early Christian beginnings in the Roman world to Christianity's expansion into Europe, the Americas, China, India, and Africa. Although conversion is often associated with a particular strand of modern Christianity, evangelical and a particular type of experience, sudden and overwhelming when examined over two millennia, it emerges as a phenomenon far more complex than any one-dimensional profile would suggest.

Migration and the Making of Global Christianity Jehu J. Hanciles, 2021-03-16 A magisterial sweep through 1500 years of Christian history with a groundbreaking focus on the missionary role of migrants in its spread Human migration has long been identified as a driving force of historical change Building on this understanding Jehu Hanciles surveys the history of Christianity's global expansion from its origins through 1500 CE to show how migration more than official missionary activity or imperial designs played a vital role in making Christianity the world's largest religion Church history has tended to place a premium on political power and institutional forms thus portraying Christianity as a religion disseminated through official representatives of church and state But as Hanciles illustrates this top down perspective overlooks the multifarious array of social movements cultural processes ordinary experiences and non elite activities and decisions that contribute immensely to religious encounter and exchange Hanciles's socio historical approach to understanding the growth of Christianity as a world religion disrupts the narrative of Western preeminence while honoring and making sense of the diversity of religious expression that has characterized the world Christian movement for two millennia In turning the focus of the story away from powerful empires and heroic missionaries *Migration and the Making of Global Christianity* instead tells the more truthful story of how every Christian migrant is a vessel for the spread of the Christian faith in our deeply interconnected world
