Dinosaur In A Haystack Reflections In Natural History:

Dinosaur in a Haystack Stephen Jay Gould, 2011-10 Gould's seventh collection of essays covers a wide range of subjects in natural history literature and popular culture from the wisdom of Charles Darwin to that of the Old Testament Psalms from the dinosaurs of Jurassic Park to the dinosaurs of the latest scientific theories from the thwarted humanity of the Frankenstein monster to the inhuman fallacies of eugenics and other pseudoscience With black and white illustrations Here is a new collection of Gould's unexpected connections between evolution and all manner of subjects literature high among them Gathered from his monthly column in *Natural History* magazine these articles should delight surprise and inform his vast readership as have his six prior volumes of essays Somehow the light bulb pops on every month as his deadline approaches some glowing fact pulled out of memory often a line from Shakespeare or Tennyson that illumines a generality Gould wishes to discuss Nature red in tooth and claw Lord Alfred's line induces dilations on the extent science can inform moral matters not much Gould believes a remembrance of the infamous Wansee protocol prompts Gould's denunciation of the genocidal looting of evolutionary theory and by extension its vulnerability to ignoramuses in general These two examples of the Gouldian essay method fortunately don't foreshadow a gloomy parade of topics Gould can as easily alight at the fun house where mass culture absorbs ideas about evolution through movies of monsters run amok from Frankenstein to Jurassic Park In other essays he plunges directly into matters of evolutionary interpretation but customarily employs a literary twist who else but Gould could link Edgar Allan Poe with his own area of professional eminence the paleontology of snails A discovery awaits in every essay in every haystack which solidifies Gould as one of the most eloquent science popularizers writing today Booklist

Dinosaur in a Haystack Stephen Jay Gould, 1996 A collection of essays written since 1992 introducing the reader to natural science and to the links between science history and culture The essays discuss subjects including New York City Jurassic Park the reconstruction of dinosaurs and the tragic myth of Frankenstein

Dinosaur in a Haystack, 1996 *Dinosaur in a Haystack* Stephen Jay Gould, 1996-01

A Short History of Nearly Everything Bill Bryson, 2005-11-18 A wonder filled quest to understand everything that has happened in the history of the earth from the Big Bang theory to the rise of civilization and beyond revised to reflect the last two decades of scientific advancement How did we get from being nothing at all to where we are today How did the age of the dinosaurs eventually give way to the age of the iPhone In this completely revised update to the international phenomenon *A Short History of Nearly Everything* Bill Bryson returns to answer these questions and many more Bryson brings a groundbreaking account of life itself to a new generation of readers and wonderers as he takes subjects often passed off as boring and incomprehensible and renders them accessible fascinating and outright amusing to anyone who's ever wondered about the world around them Introducing readers to a long list of the world's most impressive archaeologists paleontologists physicists astronomers anthropologists and mathematicians from their offices and laboratories to dig sites and field camps Bryson embarks on a journey to discover

answers to the biggest questions about the universe and ourselves A Short History of Nearly Everything 2.0 is a profoundly enlightening surprisingly humorous and charmingly clever adventure into the realm of human knowledge as only Bryson can render it His revamped Short History is a thrilling journey through time and space and his writing will make readers both new and old see the world in a whole new way

Dinosaurs at the Dinner Party Edward Dolnick, 2025-08-12 From the bestselling author of The Clockwork Universe and The Writing of the Gods an utterly delightful hugely entertaining Air Mail book about the eccentric Victorians who discovered dinosaur bones leading to a whole new understanding of human history In the early 1800s the natural world was a safe and cozy place or so people believed But then a twelve year old farm boy in Massachusetts stumbled on a row of fossilized three toed footprints the size of dinner plates the first dinosaur tracks ever found Soon in England scientists unearthed enormous bones that reached as high as a man's head Outside of myths and fairy tales no one had even imagined that creatures like three toed giants had once lumbered across the land nor dreamed that they could all have vanished hundreds of millions years ago In Dinosaurs at the Dinner Party celebrated storyteller and historian Edward Dolnick leads us through a compelling true adventure as the paleontologists of the early 19th century puzzled their way through the fossil record to create the story of dinosaurs we know today The tale begins with Mary Anning a poor uneducated woman who had a sixth sense for finding fossils buried deep inside cliffs moves to William Buckland an eccentric geologist who filled his home with specimens and famously pieced together a prehistoric scene from the fossil record inside a cave and then on to the controversial Richard Owen the era's best known scientist and the one who coined the term dinosaur Exuberant Kirkus Reviews entertaining erudite and featuring an unconventional cast of characters Dinosaurs at the Dinner Party tells the story of how the accidental discovery of prehistoric creatures upended humanity's understanding of the world and its own place within it

Metaphors for God's Time in Science and Religion S. Happel, 2016-05-20 Metaphors for God's Time in Science and Religion examines the exploratory work of metaphors for time in astrophysical cosmology chaos theory evolutionary biology and neuroscience Happel claims that the Christian God is intimately involved at every level of physical and biological science He compares how scientists and theologians both generate stories metaphors and symbols about the universe and asks who is the God who invents me

Social Theories for the Anthropocene Phoebe Godfrey, Ordoitz Galilea, 2025-11-24 This unique textbook introduces undergraduate students to key social theories from classical multicultural global and indigenous perspectives while also inviting them to understand social theories as stories that create our culturally specific social realities The readings in this collection emphasize the ways our culturally perceived social environmental divide has historically been constructed to the detriment of both society and the environment Social Theories for the Anthropocene offers students the theoretical tools necessary to re imagine and re dream First to re imagine what it means to be human as we culturally define it Second to rethink how to apply such new possibilities to the transformation of Western culture from its current self destructive trajectory to something more equitable

and more sustainable Placing readings from classical social theory in dialogue with writings from a diverse range of modern thinkers this timely reader will be indispensable for undergraduate students and instructors undertaking courses on social theory the environment climate change and ecology

The History of Natural History Gavin D. R. Bridson,2008 With over 5 300 added references this revised and updated edition is an essential source of information for scientists researchers and enthusiastic amateurs The History of Natural History is one of those key works that should be kept in easy reach of anyone interested in the study of natural history in all its branches

Prehistoric Monsters Allen A. Debus,2009-12-14 Over centuries discoveries of fossil bones spawned legends of monsters such as giants and dragons As the field of earth sciences matured during the 19th century early fossilists gained understanding of prehistoric creatures such as Tyrannosaurus Triceratops and Stegosaurus This historical study examines how these genuine beasts morphed in the public imagination into mythical powerful engines of destruction and harbingers of cataclysm taking their place in popular culture film and literature as symbols of lost worlds where time stands still

Evolution, Animal 'rights' & the Environment James B. Reichmann, 2000 Among the more significant developments of the twentieth century the widespread attention given to rights issues must surely justify ranking it somewhere near the top Never before has the issue of rights attracted such a wide audience or stirred so much controversy Until very recently rights were traditionally recognized as attributable only to humans Today we increasingly are hearing a call to extend rights to the nonhuman animal and on occasion to the environment In this book James B Reichmann S J undertakes an investigation of the metaethical grounds of rights theory with special focus on the controversial issue of whether creatures other than humans can and should be considered true subjects of rights He contends that before assigning rights to this or that individual or group whether human or not we need to be very clear about what it is we are assigning to whom and why The book argues forcefully that the various recent efforts to build a case supporting animal and environmental rights fail in their quest and that any such effort resting on a Darwinian evolutionary base is likewise condemned to fail In furtherance of this claim the author first investigates life phenomena followed by a detailed comparative study of knowing communicating and doing as these are observed in the human and the nonhuman animal This in turn is followed by an overview of diverse views advanced by contemporary environmental ethicists and animal rights advocates including Peter Singer Tom Regan J Baird Callicott Laura Westra and Don E Marietta Jr Representative though doubtless provocative conclusions drawn from this study include the claims that 1 Classic Darwinian theory provides no admissible premise from which to derive a theory of inherent inalienable rights 2 No satisfactory explanation of the origin of rights and obligation can derive save from within the context of natural law theory 3 The human person alone unqualifiedly possesses rights 4 The view that vegetarianism is an ethical mandate is neither compatible with the Christian world view nor philosophically sound ABOUT THE AUTHOR James B Reichmann S J is professor emeritus of philosophy at Seattle University where he continues to teach
