and a diverse range of international institutions **Disabled Clerics in the Late Middle Ages** Ninon Dubourg,2025-10-01 The petitions received and the letters sent by the Papal Chancery during the Late Middle Ages attest to the recognition of disability at the highest levels of the medieval Church These documents acknowledge the existence of physical and or mental impairments with the papacy issuing dispensations allowing some supplicants to adapt their clerical missions according to their abilities A disease impairment or old age could prevent both secular and regular clerics from fulfilling the duties of their divine office Such conditions can thus be understood as forms of disability In these cases the Papal Chancery bore the responsibility for determining if disabled people were suitable to serve as clerics with all the rights and duties of divine services Whilst some petitioners were allowed to enter the clergy or in the case of currently serving churchmen to stay more or less active in their work others were compelled to resign their position and leave the clergy entirely Petitions and papal letters lie at intersection of authorized institutional policy and practical sources chronicling the lived experiences of disabled people in the Middle Ages As such they constitute an excellent analytical laboratory in which to study medieval disability in its relation to the papacy as an institution alongside the impact of official ecclesiastical judgments on disabled lives

Wheatley,2022-10-20 Early attitudes toward blindness in France and England and the light those responses shed on contemporary attitudes toward disability **Disease and Disability in Medieval and Early Modern Art and Literature** Rinaldo Fernando Canalis, Massimo Ciavolella,2021 Humanity has always shown a keen interest in the pathological ranging from a morbid fascination with monsters and deformities to a genuine compassion for the ill and suffering Medieval and early modern people were no exception expressing their emotional response to disease in both literary works and to a somewhat lesser extent in the plastic arts Consequently it becomes necessary to ask what motivated writers and artists to choose an illness or a disability and its physical and social consequences as subjects of aesthetic or intellectual expression Were these works the result of an intrusion in their intent to faithfully reproduce nature or do they reflect an intentional contrast against the pre modern portrayal of spiritual ideals and later through the influence of the classics the rediscovered importance and

beauty of the human body The essays contained in this volume address these questions albeit not always directly but rather through an analysis of the societal reactions to the threats and challenges that essentially unopposed disease and physical impairment presented They cover a wide range of responses variable of course according to the period under scrutiny its technological moment and the usually fruitless attempts at treatment [Viewing Disability in Medieval Spanish Texts](#)
Connie Scarborough,2025-10-01 This book is one of the first to examine medieval Spanish canonical works for their portrayals of disability in relationship to theological teachings legal precepts and medical knowledge Connie L Scarborough shows that physical impairments were seen differently through each lens Theology at times taught that the disabled were marked by God their sins rendered on their bodies at other times they were viewed as important objects of Christian charity The disabled often suffered legal restrictions allowing them to be viewed with other distinctive groups such as the ill or the poor And from a medical point of view a miraculous cure could be seen as evidence of divine intervention This book explores all these perspectives through medieval Spain s miracle narratives hagiographies didactic tales and epic poetry
