**English for Engineers and Technologists** Rod Ellis, 2003-11 English for Engineers Technologists is in two volumes and has been written by teachers It has been produced by the Department of Humanities and Social Sciences Anna University and is a British Council aided project The writing of the book was supervised by three specialists from the Ealing College of Higher Education London The contents of the books are based on eight real life topics which are interesting and relevant to engineering technical students Each unit is in turn divided into three sub topics eg the Resources unit has water

gold and human resources The exercises in each of the lesson units are aimed at developing in the students skills in listening discussion reading writing and presentation Understand Computers Through Common Sense Stanley Greenblatt,1983

*Forthcoming Books* Rose Army,1989-09 **Understanding Computers** Don Cassel,1990 Illustrated Chronology and Index ,1989 Contains index to entire series Understanding computers glossary of terms and a timeline of computer science

*Understanding Computers & Information Processing* Charles S. Parker,1994 **Artificial Whiteness** Yarden Katz,2020-11-17 Dramatic statements about the promise and peril of artificial intelligence for humanity abound as an industry of experts claims that AI is poised to reshape nearly every sphere of life Who profits from the idea that the age of AI has arrived Why do ideas of AI s transformative potential keep reappearing in social and political discourse and how are they linked to broader political agendas Yarden Katz reveals the ideology embedded in the concept of artificial intelligence contending that it both serves and mimics the logic of white supremacy He demonstrates that understandings of AI as a field and a technology have shifted dramatically over time based on the needs of its funders and the professional class that formed around it From its origins in the Cold War military industrial complex through its present day Silicon Valley proselytizers and eager policy analysts AI has never been simply a technical project enabled by larger data and better computing Drawing on intimate familiarity with the field and its practices Katz instead asks us to see how AI reinforces models of knowledge that assume white male superiority and an imperialist worldview Only by seeing the connection between artificial intelligence and whiteness can we prioritize alternatives to the conception of AI as an all encompassing technological force Bringing together theories of whiteness and race in the humanities and social sciences with a deep understanding of the history and practice of science and computing **Artificial Whiteness** is an incisive urgent critique of the uses of AI as a political tool to uphold social hierarchies
