*Dimensions of Creativity* Margaret A. Boden, 1996 *Dimensions of Creativity* brings together original articles that draw on a range of disciplines from the history and sociology of science psychology philosophy and artificial intelligence to ask how creative ideas arise and whether creativity can be objectively defined and measured *Dimensions of Creativity* brings together original articles that draw on a range of disciplines from the history and sociology of science psychology philosophy and artificial intelligence to ask how creative ideas arise and whether creativity can be objectively defined and measured Margaret Boden and her colleagues Simon Schaffer Gerd Gigerenzer David N Perkins Howard Gardner Colin Martindale and Hans J Eysenck demonstrate that creativity requires not only challenging new ideas but their acceptance by some relevant social group Although some new ideas can arise as novel associations others are generated by exploiting structural features of an existing conceptual space Strong motivations often drive the creators and those who evaluate and perpetuate their work The seven essays although very different are complementary The book can serve as an up to date introduction to the study of creativity in various disciplines The many references provide a way into the relevant literature A Bradford Book

**Dimensions of Creativity** Donald J. Treffinger, 1996      **Creative Dimensions of Suffering** A. M. Ghadirian, 2009 *Creative Dimensions of Suffering* is an intriguing combination of psychiatry and spirituality that illustrates the power of creativity to treat suffering An examination of the lives of many famous artists who suffered including Van Gogh Tchaikovsky and Beethoven gives insight into how they dealt with their adversity through creativity Dr Ghadirian explores how various conditions such as alcoholism depression bipolar disorder and dementia can influence a person's creative impulse and how creativity and spirituality can help a person deal with trauma He describes the courage of many other well known figures such as Helen Keller and Christopher Reeve who were able to overcome their suffering and emerge victorious over daunting odds Finally drawing on principles found in the teachings of the Baha'i Faith Ghadirian attempts to explain suffering its place in human society and how it can lead us to a closer happier relationship with God as well as a better relationship with ourselves and with others Indeed many of those who have suffered the most have found new meaning through adversity and have emerged victorious      *Dimensions of Creativity Achievement Project*, 1994      **An Analysis of Certain Dimensions of Creativity** Surya Kant Jha, 1978      **Psychological Dimensions of Organizational Behavior** Barry M. Staw, 1995 This comprehensive paperback book contains carefully chosen pieces that cover human behavior in organizations from individual motivation to organizational processes This anthology offers a broad mix of classic and recent articles it covers emerging areas of interest such as business ethics and processes of creativity and change This collection of readings is separated into four clearly defined dimensions why and how we work thinking and making decisions interacting with others social and group processes and facing the future creativity innovation and organizational leadership An excellent resource for managers and other executives who need to know how to effectively lead their departments this book provides the skills necessary for

**The Future of Post-human Creative Thinking** Peter Baofu,2009 What exactly makes creative thinking so magical that somehow oeveryone can be creative and by implication creativity is a good thing to have to the point that this popular view is fast becoming a fashionable nonsense in this day and age of ours To put things in a historical perspective this popular view contrasts sharply with the opposing view in the older days e g during the Enlightenment and Romantic eras when people used to think that creativity was primarily for the selected few with extraordinary abilities Contrary to the respective conventional wisdom in each of the two opposing eras neither of the two views is valid Ours is no more so than theirs This is not to imply of course that there are only a few instances of creativity in human history or in reverse that creativity can be equally taught to everyone and for that matter that there is absolutely nothing good about creativity Obviously extreme views like this are far from the truth The point in this book however is to show an alternative better way to understand the nature of creative thinking which goes beyond both convergent and divergent thinking while learning from them The current fashionable nonsense on creative thinking has tended to minimize its hidden downsides and exaggerate its overstated promises as part of a new ideology in this age of ours In addition there is nothing intrinsically good or bad about ocreative thinking just as there is nothing essentially good or evil about oeGod oethe King oeMotherland or the like by analogy They have all been used and misused in accordance to the interests and powers that be over the ages If true this seminal view will fundamentally change the way that we think about the nature of imagination and intuition with its enormous implications for the future of invention and innovation in a small sense and what I originally called its oepost human fate in a large one
