Beyond Description Ryan Bishop, John Phillips, Wei-Wei Yeo, 2004-08-02 Treated from a range of disciplinary perspectives this book addresses and challenges issues of space historicity architecture and textuality by focusing on Singapore's singular position in the region and as a global city

Beyond Description Paolo Heywood, Matei Candea, 2023-12-15 Beyond Description brings anthropologists and other social scientists together to examine the problem of explanation What is an explanation What can it add What makes it authoritative clarifying or misleading Whom does it serve and how is it produced These questions lie at the heart of recent public crises of confidence in expertise political representation and classic liberal visions of whom we can rely on for true and trustworthy accounts In a world beset by events and processes that seem to defy expert predictions of their impossibility and in which post hoc accounts can often feel more like rationalizations than explanations competing voices vie for public presence and seek to silence one another Anthropology and the social sciences face such questions too making contemporary explanatory practice both an empirical and a reflexive challenge By combining ethnographic studies of practices of explanation in a range of contemporary political medical artistic religious and bureaucratic settings the essays in Beyond Description offer critical examinations of changing norms and forms of explanation in the world and within anthropology itself

Postcomposition Sidney I Dobrin, 2011-06-02 Leading a burgeoning self critical moment in composition studies and writing program administration Postcomposition is a fundamental reconsideration of the field that attempts to shift the focus away from pedagogy and writing subjects and toward writing itself In this forceful and reasoned critique of many of the primary tenets and widely accepted institutional structures of composition studies Sidney I Dobrin delivers a series of shocks to the system meant to disrupt the pedagogical imperative and move beyond the existing limits of the discipline Dobrin evaluates the current state of composition studies underscoring the difference between composition and writing and arguing that the field's focus on the administration of writing students and its historically imposed prohibition on theory greatly limit what can be understood about writing Instead he envisions a more significant approach to writing one that questions the field's conservative allegiance to subject and administration and reconsiders writing as spatial and ecological Using concepts from ecocomposition spatial theory network theory complexity theory and systems theory Postcomposition lays the groundwork for a networked theory of writing and advocates the abandonment of administration as a useful part of the field He also challenges the usefulness of rhetoric in

writing studies showing how writing exceeds rhetoric Postcomposition is a detailed consideration of how posthumanism affects the field's understanding of subjectivity It also tears at the seams of the contingent labor problem As he articulates his own frustrations with the conservatism of composition studies and builds on previous critiques of the discipline Dobrin stages a courageous and inevitably polemical intellectual challenge to the entrenched ideas and assumptions that have defined composition studies

Passions of the Mind Harold N. Boris, 1993-10 *Passions of the mind* advances the view that as social animals we are only partly understandable in terms of individual psychodynamics Within us another principle is at work to preserve the Group even at the expense of the individual As we pursue our own individual courses in life seeking egoistic satisfactions we are bound by countervailing forces biologically rooted social in nature which cause us to identify with the aims of the Group even if that requires of us a failure to thrive indeed our very deaths In this three way synthesis of classical psychoanalysis recent interpersonal and object relations psychology and current selectivistic evolutionary biology Professor Harold N Boris draws on the work of Melanie Klein and Wilfred R Bion and provides a bridge between the personal and biosocial psychologies of which we are made up He elaborates on his concepts of the Couple which involves the pleasure principle and egoistic identity and the Pair which enlists his newly proposed selection principle in representing social identity and biological imperatives Professor Boris shows how these two states of mind each with its own characteristic themes and variations feelings and fantasies and presences and absences at once compete conjoin and intertwine in the paradoxical dialectic of psychoanalysis In the latter half of the book Professor Boris provides a transcript of an analysis a composite of what the experience in the consulting room is both for the patient and analyst These illustrative sessions complete with commentary give the reader a rare glimpse of a living psychoanalysis in process In addition to his day to day work in the psychoanalytic consulting room Boris brings to this subtle and scholarly book his analytic work in many other settings in day and overnight schools for normal and disturbed children in rural villages and urban centers and with individuals and groups
