Architectures of Care Brittany Utting, 2023-12-05 Drawing from a diverse range of interdisciplinary voices this book explores how spaces of care shape our affective material and social forms from the most intimate scale of the body to our planetary commons Typical definitions of care center around the maintenance of a livable life encompassing everything from shelter and welfare to health and safety Architecture plays a fundamental role in these definitions inscribed in institutional archetypes such as the home the hospital the school and the nursery However these spaces often structure modes of care that prescribe gender roles bodily norms and labor practices How can architecture instead engage with an expanded definition of care that questions such roles and norms producing more hybrid entanglements between our bodies our collective lives and our environments Chapters in this book explore issues ranging from disabled domesticities and nursing unbuilding whiteness in the built environment practices and pedagogies of

environmental care and the solidarity networks within The Cloud Case studies include Floating University Berlin commoning initiatives by the Black Panther party and hospitals for the United Mine Workers of America among many other sites and scales of care Exploring architecture through the lenses of gender studies labor theory environmental justice and the medical humanities this book will engage students and academics from a wide range of disciplines

Housing Design for an Increasingly Older Population Victor Regnier, 2018-08-06 Longer lifespans and the needs of the oldest old are challenging the senior living industry to find bold and compassionate solutions to combine programs and services with housing Victor Regnier s latest research provides a thoughtful and insightful roadmap that arrays new ways of thinking from small scale settings to community based options International case studies offer possible solutions with the best thinking from around the globe all with Vic s unique perspective of extracting themes and concepts that are broadly applicable and essential to addressing the needs of those that live on life s fragile edge David Hoglund FAIA

Supporting the independence of the oldest old is a tough problem Victor Regnier addresses in his latest book on aging and housing Like previous work Victor relies on the best practices of northern Europeans to outline a three prong approach First providing extremely comprehensive home care services in an apartment for life setting Second reforming the conventional nursing home by exploring small group style accommodations Third combining new technology with community based services to age in place Case studies document the experiences of others in making these programs work here and abroad The magnitude of the 90 and 100 population increases in the next 50 years make it clear how important it is to address this concern today Edward Steinfeld Darch The movement of health care from the institution to the home is a theme that Regnier identifies as one of the most important lessons in rethinking the issue of how to support the ever growing and increasingly aged older population here and abroad He examines simple but profound approaches we can take in making long term care a more humane proposition Familiar themes like humanizing technology and optimizing the impact of the natural environment are brought together with clear policy thinking about what we need to do The timing is good because the impact of this growing segment of society will have major repercussions on health care for the next 50 70 years Stephan Verderber Ph D A comprehensive guide to designing housing for the world s aging population The dilemma of helping older people maintain their independence through better housing with services is growing This book presents innovative solutions for those who create and provide housing for the world s increasingly longer living population By focusing on three specific housing and service arrangements it offers alternatives that provide greater freedom of choice than the current living arrangements that

exist today It presents selected examples of housing and service solutions from the US Sweden Denmark and the Netherlands to stimulate thinking about the possibilities of community based service models Housing Design for an Increasingly Older Population looks at a trio of options for housing the oldest old the Dutch Apartment Condo for Life Model AFL decentralized Small Green Houses and the provision of enhanced personal and health care for people who want to stay in their own home It offers unique and eye opening chapters covering what older people want what age changes affect independence demographics and living arrangements how long term care is defined concepts and objectives for housing the frail care giving and management practices that avoid an institutional lifestyle innovative case studies programs that encourage staying at home with service assistance therapeutic use of outdoor spaces how technology will help people stay independent and more Based on the author s numerous conversations with other experts as well as his examinations of high quality settings from Northern Europe and the US Building case study examples showcase innovative and compassionate solutions In depth coverage of three major systems that work Examines successful programs such as PACE Friendly Cities NORC and the Village to Village Network to demonstrate the progress made in helping older frail people stay in their own homes for as long as possible Housing Design for an Increasingly Older Population Redefining Assisted Living for the Mentally and Physically Frail is an important book for those who create design and manage assisted living and skilled nursing facilities as well as for those who set policies regarding health and personal care for our world s aging society [Independent Living](#) DeVonna L. Cunningham Cervantes,1997 **Indigenous Cultural Centers and Museums** Anoma Pieris,2016-07-14 Here is a lavishly illustrated descriptive survey of 48 leading indigenous cultural centers around the world 35 are from Australia and 13 from North America Japan Europe and Asia The book shows how each is a potentially transformative politically compelling addition to the field of cultural production illustrating how the facilities all built in the last three decades have challenged assumptions about nature culture and built form Using the spatial temporal practice of place making as the starting point the facilities highlighted here are described in terms of collaborations between a number of stake holders and professional consultants The book adopts the format of a descriptive survey with separate chapters devoted to individual case studies A broad introductory chapter which presents the arguments and overview precedes richly illustrated short individual essays on selected projects Each chapter commences with the details of the project including location area cost and consultants followed by a project description and discussion of background design development and reception of the projects Each project is approached as an architectural commission detailing the critical criteria consultants and processes The format is adopted from architectural review essays typically used in awards or journal publications within the profession which are accessible and relevant for both academics and practitioners Considerable attention is given to the process and to the evaluation of the project as a cultural response Each case study has been written with consultation of architects or administrators of the facilities for accuracy Indigenous Cultural Centers and Museums An Illustrated International Survey

documents a rich legacy of collaboration across the spatial disciplines combining creative art practice architecture construction landscape design and urban design in the production of unique and culturally significant social institutions This book provides material on hitherto unknown bodies of work of talented architectural practices working collaboratively with culturally different client groups and developing consultative processes that test models for inter cultural engagement
