## Crystal Lithium:

The Crystal Lithium James Schuyler, 1972      **Ferroelectric Materials and Ferroelectricity** T. F. Connolly, 2013-11-11  
This volume is a joint effort of the Research Materials Information Center RMIC of the Solid State Division at Oak Ridge National Laboratory and the Libraries and Information Systems Center at Bell Telephone Laboratories BTL Murray Hill NJ The Research Materials Information Center has since 1963 been answering inquiries on the availability preparation and properties of inorganic solid state research materials The preparation of bibliographies has been essential to this function and the interest in ferroelectrics led to the compilation of the journal and report literature on that subject The 1962 book *Ferroelectric Crystals* by Jona and Shirane was taken as a cutoff point and all papers through mid 1969 received by the Center have been included The Libraries and Information Systems Center of BTL has over a period of years developed a proprietary package of computer programs called BELDEX which formats and generates indexes to bibliographic material This group therefore undertook to process RMIC's ferroelectric references by BELDEX so that both laboratories could have the benefit of an indexed basic bibliography in this important research area      The Structure of Crystals Ralph Walter Graystone Wyckoff, 1924      **Notices of Judgment Under the Food and Drugs Act** United States. Food and Drug Administration, 1915      **Nuclear Science Abstracts** ,1973      **Ferroelectrics Literature Index** T. F. Connolly, 2012-12-06  
Research on ferroelectricity and ferroelectric materials started in 1920 with the discovery by Valasek that the variation of spontaneous polarization in Rochelle salt with sign and magnitude of an applied electric field traced a complete and reproducible hysteresis loop Activity in the field was sporadic until 1935 when Busch and co workers announced the observation of similar behavior in potassium dihydrogen phosphate and related compounds Progress thereafter continued at a modest level with the undertaking of some theoretical as well as further experimental studies In 1944 von Hippel and co workers discovered ferroelectricity in barium titanate The technological importance of ceramic barium titanate and other perovskites led to an upsurge of interest with many new ferroelectrics being identified in the following decade By 1967 about 2000 papers on various aspects of ferroelectricity had been published The bulk of this widely dispersed literature was concerned with the experimental measurement of dielectric crystallographic thermal electromechanical elastic optical and magnetic properties A critical and excellently organized compilation based on these data appeared in 1969 with the publication of Landolt Bornstein Volume 111 3 This superb tabulation gave instant access to the results in the literature on nearly 450 pure substances and solid solutions of ferroelectric and antiferroelectric materials Continuing interest in ferroelectrics spurred by the growing importance of electrooptic crystals resulted in the publication of almost as many additional papers by the end of 1969 as had been surveyed in Landolt Bornstein      **Nostrums and Quackery** ,1921      **The Mineralogical Magazine and Journal of the Mineralogical Society** ,1894      **Mineralogical Magazine** ,1894      Nostrums and Quackery and Pseudo-medicine American Medical Association, 1921      **Nostrums and Quackery** American Medical

Association,1921    **Nuclear Science Abstracts** ,1964    **Chemist and Druggist** ,1930    *Chemical Abstracts* ,1927  
Quarterly Journal of the Chemical Society of London Chemical Society (Great Britain),1923    Journal of the Chemical Society ,1923    Journal of the Chemical Society Chemical Society (Great Britain),1925 Titles of chemical papers in British and foreign journals included in Quarterly journal v 1 12    *New Scientist* ,1969    *Watts' Dictionary of Chemistry* Henry Watts,1892    The Chicago Clinic ,1908
