Do No Harm:

Do No Harm Stephen G. Ray, 2003 Among the evils addressed by Christian theology says Stephen Ray must be the evil perpetuated by its own well meant theologies His important project examines the downside of the category of social sin especially in theologians use of destructive stereotypes that have kept Christians from realizing and engaging the most pervasive social evils of our time racism and anti-Semitism To make his case Ray examines problematic ways in which several theologians describe the reality of social evil Theologians he contends often unwittingly describe social sin in terms that may themselves be profoundly racist sexist heterosexist anti-Semitic and classist He contends that they must attend more carefully to the social evils deeply embedded in their own patterns of language and thought Ray looks specifically to the work of Reinhold Niebuhr and Dietrich Bonhoeffer to document unintended consequences of theology's oversights and then to Augustine Luther and Calvin to analyze the strains and strengths of traditional notions Not only theologians and ethicists but also ministers and laity will benefit from Ray's thoughtful reconsideration of the social stance of Christian theology **First**

Do No Harm Professor Sheila A M McLean, 2013-02-28 This collection brings together essays from leading figures in the field of medical law and ethics which address the key issues currently challenging scholars in the field It has also been compiled as a lasting testimony to the work of one of the most eminent scholars in the area Professor Ken Mason The collection marks the academic crowning of a career which has laid one of the foundation stones of an entire discipline The wide ranging contents and the standing of the contributors mean that the volume will be an invaluable resource for anyone studying or working in medical law or medical ethics **Yanomami** Rob Borofsky, 2005-01-31 Yanomami raises questions

central to the field of anthropology questions concerning the practice of fieldwork the production of knowledge and anthropology's intellectual and ethical vision of itself Using the Yanomami controversy one of anthropology's most famous and explosive imbroglios as its starting point this book draws readers into not only reflecting on but refashioning the very heart and soul of the discipline It is both the most up to date and thorough public discussion of the Yanomami controversy available and an innovative and searching assessment of the current state of anthropology The Yanomami controversy came to public attention through the publication of Patrick Tierney's best selling book *Darkness in El Dorado* in which he accuses James Neel a prominent geneticist who belonged to the National Academy of Sciences as well as Napoleon Chagnon whose introductory text on the Yanomami is perhaps the best selling anthropological monograph of all time of serious human rights violations This book identifies the ethical dilemmas of the controversy and raises deeper structural questions about the discipline A portion of the book is devoted to a unique roundtable in which important scholars on different sides of the issues debate back and forth with each other This format draws readers into deciding for themselves where they stand on the controversy's and many of anthropology's central concerns All of the royalties from this book will be donated to helping the Yanomami improve their healthcare **Signal Infinities** Melanie Siebert, 2024-08-20 Expansive and moving Signal

Infinities courses with the intelligences of the body its music and limits in search of more enlivening ethical relationships with each other and the earth In Signal Infinities a therapist takes up an apprenticeship to a lake to bare attention Pain arrives Collective and personal injuries and errors pile up The glaciers and ancient forests are disappearing Unlike the Iliad s soldiers the cast of youth in this long poem harbour traumas that are internal hidden unsung Yet each wounded one flickers with defiance and dignity So too the blue collar winds the little brown bats and roadside ferns who send out their urgent signals With unbridled oxygen affinity this work attunes to submerged sensations reflexes tonal shifts chemical transmissions and streaming kinesics It seeks an ethics that respects the body s imperfect intercom its private coulees and unstable weathers its sheer limits Amid too little too late conditions Signal Infinities floods with connections that are elemental illuminating and wildly felt
