## **Autonomous Development:**

**Autonomous Development** Raff Carmen,1996 Raff Carmen is one of the very few challenging and ground breaking thinkers who can change the way in which we perceive and practise development In this comprehensive book he succeeds in interweaving a vast panorama of theories and methodologies with practical case studies to bring complex issues dramatically to life His unerring commitment to bottom up development rooted in people s organizations and the power of culture is refreshing at a time of widespread disillusion Most importantly he convinces us that alternative approaches have worked and can work in the future Highly recommended for anyone who wants to challenge assumptions and broaden the horizon of development debate and practice *Autonomous Development* Raff Carmen,1996

*The Family and Social Change in Chinese Societies* Dudley L. Poston, Jr., Wen Shan Yang, Demetrea Nicole Farris,2013-11-26 This book focuses on families and their changes in Taiwan and China Traditional notions of what constitutes a family have been changing in China Taiwan and other Asian countries The chapters in this book provide interesting methodological and substantive contributions to the discourse on family and social change in Chinese societies

They also underscore the implications of the various social changes in Chinese families. Written by Chinese and Western scholars, they provide an unprecedented overview of what is known about the effects of social change on Chinese families. One might think that defining a family is an easy task because the family is so significant to society and is universal. The family is the first place we learn culture, norms, values, and gender roles. Families exist in all societies throughout the world, but their constitution differs. In the past several decades, there have been many changes in the family in Taiwan and China. For instance, whereas in the West we use a bilineal system of descent in which descent is traced through both the mother's side and the father's side of the family, in many parts of China, descent is patrilineal, although this is changing, and China and Taiwan are starting to assume a family constitution similar to that in the West. This and other issues are discussed in great detail in this book. Indeed, it is the very nature of the differences that motivated the writing of this book on changing families in Taiwan and China.

The chapters in Part I, *The Family in Taiwan and China*, focus on the basic family issues in Taiwan and China that provide the groundwork for many of the chapters that follow. Chapter 1 is about the distribution of resources in the family in Taiwan. Chapter 2 focuses on filial piety and the autonomous development of adolescents in the Taiwanese family, and Chapter 3 explores the important issue of family poverty in Taiwan. Chapter 4 moves away from Taiwan and looks at several issues of family growth and change in Hong Kong, noting the interesting similarities and differences between Hong Kong and China.

Part II, *Issues of Marriage, the Family, and Fertility in Taiwan and China*, focuses specifically on marriage, family, and fertility. In Chapter 5, the authors discuss the relationships between marital status, socioeconomic status, and the subjective well-being among women in Hong Kong and Taiwan. Chapter 6 describes patterns of sexual activity in China and the United States. Chapter 7 considers gender imbalances in Taiwan and their impact on the marriage market. Chapter 8 also focuses on Taiwan and examines the effects of mothers' attitudes on daughters' interaction with their mothers in law. Chapter 9 compares female and male fertility trends and changes in Taiwan.

Part III, *Children and the Family in East Asia and in Western Countries*, consists of comparative studies of the family and children. Chapter 10 examines the dynamics of grandparents caring for children in China. Chapter 11 explores family values and parent-child interaction in Taiwan. Chapter 12 examines the significant amount of diversity among families in contemporary Taiwan. Chapter 13 describes adolescent development in Taiwan. Chapter 14 examines the impact of son preference on fertility in China, South Korea, and the United States. And Chapter 15 explores the determinants of intergenerational support in Taiwan.

The final chapter in our book, the only chapter in Part IV, *The Family and the Future in Taiwan*, examines the future of the family in Taiwan with respect especially to the marriage market and aged dependency.

The *Industrial Electronics Handbook*, Second Edition, combines traditional and newer, more specialized knowledge that will help industrial electronics engineers develop practical solutions for the design and implementation of high-power applications. Embracing the broad technological scope of the field, this collection explores fundamental areas

including analog and digital circuits electronics electromagnetic machines signal processing and industrial control and communications systems It also facilitates the use of intelligent systems such as neural networks fuzzy systems and evolutionary methods in terms of a hierarchical structure that makes factory control and supervision more efficient by addressing the needs of all production components Enhancing its value this fully updated collection presents research and global trends as published in the IEEE Transactions on Industrial Electronics Journal one of the largest and most respected publications in the field As intelligent systems continue to replace and sometimes outperform human intelligence in decision making processes they have made substantial contributions to the solution of very complex problems As a result the field of computational intelligence has branched out in several directions For instance artificial neural networks can learn how to classify patterns such as images or sequences of events and effectively model complex nonlinear systems Simple and easy to implement fuzzy systems can be applied to successful modeling and system control Illustrating how these and other tools help engineers model nonlinear system behavior determine and evaluate system parameters and ensure overall system control Intelligent Systems Addresses various aspects of neural networks and fuzzy systems Focuses on system optimization covering new techniques such as evolutionary methods swarm and ant colony optimizations Discusses several applications that deal with methods of computational intelligence Other volumes in the set Fundamentals of Industrial Electronics Power Electronics and Motor Drives Control and Mechatronics Industrial Communication Systems

**The Routledge Handbook of Postcolonial Social Work** Tanja Kleibl, Ronald Lutz, Ndangwa Noyoo, Benjamin Bunk, Annika Dittmann, Boitumelo Seepamore, 2019-07-30 The Routledge Handbook of Postcolonial Social Work reflects on and dissects the challenging issues confronting social work practice and education globally in the post colonial era By analysing how countries in the so called developing and developed world have navigated some of the inherited systems from the colonial era it shows how they have used them to provide relevant social work methods which are also responsive to the needs of a postcolonial setting This is an analytical and reflexive handbook that brings together different scholars from various parts of the world both North and South so as to distill ideas from scholars relating to ways that can advance social work of the South and critique social work of the North in so far as it is used as a template for social work approaches in postcolonial settings It determines whether and how approaches knowledge bases and methods of social work have been indigenised and localised in the Global South in the postcolonial era This handbook provides the reader with multiple new theoretical approaches and empirical experiences and creates a space of action for the most marginalised communities worldwide It will be of interest to researchers and practitioners as well as those in social work education

*The Politics of Urban Development* Clarence Nathan Stone, Heywood T. Sanders, 1987 In the past twenty years the study of urban politics has shifted from a predominant concern with political culture and ethos to a preoccupation with political economy particularly that of urban development Urban scholars have come to recognize that cities are shaped by forces beyond their boundaries From that focus have emerged the views that cities are clearly engaged in economic competition that market processes are shaped by national policy decisions sometimes intentionally and sometimes inadvertently and that the costs and benefits of economic growth are unevenly distributed But what else needs to be said about the policies and politics of urban development To supplement prevailing theories *The Politics of Urban Development* argues that the role of local actors in making development decisions merits closer study Whatever the structural constraints politics still matters Collectively the essays provide ample evidence that local government officials and other community actors do not simply follow the imperatives that derive from the national political economy they are able to assert a significant degree of influence over the shared destiny of an urban population The impact of the collection is to heighten awareness of local political practices and of how and why they make a difference

**Routledge Encyclopedia of International Political Economy** R. J. Barry Jones, 2002-09-11 This three volume Encyclopedia offers the first comprehensive and authoritative survey of the rapidly developing field of international political economy Its entries cover the major theoretical issues and analytical approaches within the field The set also provides detailed discussion of the contributions of key individuals and surveys a wide range of empirical conditions and developments within the global political economy including its major institutions The Encyclopedia has been designed to be eclectic in approach and wide ranging in coverage Theoretical entries range from discussions of the definition and scope of the field through core methodological questions such as rationalism and the structure agent problem to surveys of the major theories and approaches employed in the study of the international political economy
