## **Autonomy Or Dependence:**

*Autonomy and Dependence in the Family* Rita Liljestrom, 2003-09-02 The width of this problematic is skillfully illustrated in this volume where scholars sociologists and psychologists from countries at the opposite edges of the European continent Turkey and Sweden discuss the structural conditions and moral [The Autonomy Myth](#) Martha Albertson Fineman, 2005 An exposé of flaws in American policies regarding the self reliance of families argues that policymakers have compromised the well being of everyday individuals by limiting the definition of acceptable family units and placing unrealistic responsibilities on contemporary families presenting a model for caretaking relationships that provides extra support for children and the elderly Reprint *The Handbook of Transformative Learning* Edward W. Taylor, Patricia Cranton, 2012-04-06 The Handbook of Transformative Learning The leading resource for the field this handbook provides a comprehensive and critical review of more than three decades of theory development research and practice in transformative learning The starting place for understanding and fostering transformative learning as well as diving deeper the volume distinguishes transformative learning from other forms of learning explores future perspectives and is designed for scholars students and practitioners PRAISE FOR THE HANDBOOK OF TRANSFORMATIVE LEARNING This book will be of inestimable value to students and scholars of learning irrespective of whether or not their emphasis is on transformative learning It should find its way to the reference bookshelves of every academic library focusing on education teaching learning or the care professions PETER JARVIS professor of continuing education University of Surrey Can there be a coherent theory of transformative learning Perhaps This handbook goes a long way to answering this question by offering a kaleidoscope of perspectives including non Western that consider the meaning and practice of transformative learning SHAUNA BUTTERWICK associate professor University of British Columbia This handbook will be valuable and accessible to both scholars and practitioners who are new to the study of adult education and transformative learning and to more seasoned scholars who seek a sophisticated analysis of the state of transformative learning thirty years after Mezirow first shared his version of a then fledgling theory of adult learning JOVITA ROSS GORDON professor and program coordinator MA in Adult Education Texas State University

**Autonomy and Dependence in Old Age** Andrew Joseph Christiansen, 1985 **Autonomy Or Dependence?** Vicky Mancuso Brehm, 2004 *Autonomy or Dependence* explores the concept and practice of partnership between non government organisations NGOs in the North and South Based on a rigorous four year study the book draws together the perspectives of a group of European NGOs and compares these with the experiences of a selection of their partners in Brazil Cambodia and Tanzania The authors look ahead to how partnerships are changing as networks and alliances of Northern and Southern civil society organisations join together to work on common issues *Sustainable Innovation* René Jorna, 2017-09-08 HOW SUSTAINABLE IS INNOVATION Problematically most contemporary patterns of innovation in human social systems and organisations are not sustainable This prevents people from learning effectively from recognising and solving their problems

and from operating in sustainable ways It is arguably why societies businesses and industries around the world are so unsustainable Sustainable innovation is a pattern of social learning and problem solving that is itself sustainable The sustainability of innovation moreover is linked to the sustainability of its outcomes which manifest themselves in what people produce and do in the world Sustainable innovation then is a necessary precondition for sustainability in how societies and organisations function the ways they organise the products and services they make the energy and resources they use and the wastes they produce As challenges such as demographic pressures ethnic tensions terrorism global poverty pandemics and abrupt climate change force their way into mainstream politics and business so we see growing interest in innovation entrepreneurial solutions and critically issues such as how to ensure successful solutions replicate and scale Sustainable Innovation aims to illustrate that shift Instead of simply focusing on environmental and technological matters it views and evaluates innovation for sustainability in terms of the human social and management challenges and responses It argues that a just efficient and sustainable balancing of these elements is best achieved by the development of new knowledge and by the evolution of better means both of embedding that emerging knowledge in organisations and institutions and of managing the relevant flows of information knowledge and wisdom The book stresses that claims that a particular product production process or service are sustainable usually assume that an appropriate balance has been achieved between people planet and profit However calculating the sustainability of such things let alone of complex systems such as enterprises or economies can be impossible Instead of sustainability the book favours the use of terms such as making sustainable emphasising that in dynamic operating environments organisational processes are changing constantly whether or not they are under effective strategic control by management Innovation too is dynamic by definition Sustainable Innovation argues that there must be a constant focus on the triple bottom line of economic social and environmental value creation during the innovation process Sustainable innovation is a new challenge for organisations It is a process that should permeate the whole organisation in terms of its members its tasks its coordination mechanisms and its procedures Waste or pollution should not be seen as the reason for further intervention downstream but as an end of the pipe effect which could be organisationally cured upstream Developed from the Dutch research programme Knowledge Creation for Sustainable Innovation this book presents empirical research and cases to develop a theory of sustainable innovation that is based on management of knowledge knowledge and cognition and innovation approaches Sustainable Innovation suggests that knowledge and innovation will be the key drivers of social and corporate sustainability in the years ahead It will be essential reading for managers and researchers in areas such as sustainability innovation knowledge management and organisational learning

Frames and Constructions in Metaphoric Language Karen Sullivan, 2013-01-01 Frames and constructions in metaphoric language shows how linguistic metaphor piggybacks on certain patterns of constructional meaning that have already been identified and studied in non metaphoric language Recognition of these shared semantic structures and comparison of their roles in metaphoric and non
