**Hello Avatar** B. Coleman,2023-12-05 An examination of our many modes of online identity and how we live on the continuum between the virtual and the real Hello Avatar Or lISay 0 Hello Avatar is a tiny piece of user friendly code that allows us to program our virtual selves In Hello Avatar B Coleman examines a crucial aspect of our cultural shift from analog to digital the continuum between online and off what she calls the x reality that crosses between the virtual and the real She looks at the emergence of a world that is neither virtual nor real but encompasses a multiplicity of network combinations And she argues that it is the role of the avatar to help us express our new agency our new power to customize our networked life By avatar Coleman means not just the animated figures that populate our screens but the gestalt of images text and multimedia that make up our online identities in virtual worlds like Second Life and in the form of email video chat and other digital artifacts Exploring such network activities as embodiment extreme virtual violence and the work in virtual reality labs and offering sidebar interviews with designers and practitioners she argues that what is new is real time collaboration and copresence the way we make connections using networked media and the cultures we have created around this The star of this drama of expanded horizons is the networked subject all of us who represent aspects of ourselves and our work across the mediascape

**The Social Life of Avatars** Ralph Schroeder,2012-12-06 Virtual reality VR technology has been developed commercially since the early 1990s 1 Yet it is only with the growth of the Internet and other high bandwidth links that VR systems have increasingly become networked to allow users to share the same virtual environment VE Shared YEs raise a number of interesting questions what is the difference between face to face interaction and interaction between persons inside YEs How does the appearance of the avatar as the

graphical representation of the user has become known change the nature of interaction And what governs the formation of virtual communities This volume brings together contributions from social scientists and computer scientists who have conducted research on social interaction in various types of YEs Two previous volumes in this CSCW book series 2 3 have examined related aspects of research on YEs social navigation and collaboration although they do not always deal with VRIVEs in the sense that it is used here see the definition in Chapter 1 The aim of this volume is to explore how people interact with each other in computer generated virtual worlds

**The Social Life of Avatars** Ralph Schroeder, 2002-01-10 Virtual reality technology has been developed commercially since the early 1990s but it is only recently with the popularity of the internet that it has become feasible to link many users simultaneously in shared virtual environments This raises a number of interesting questions such as what is the difference between face to face and avatar to avatar interaction What patterns govern the formation of virtual communities How does the appearance of the avatar change the nature of the communication There has been much speculation about issues such as these but research is still at a relatively early stage This is the first book to bring together work from relevant disciplines to form a reference guide for practitioners students and researchers interested in how we interact in computer generated environments It contains contributions from most of the key people in this area including Microsoft Research's Virtual Worlds Group and presents their findings in a way which is accessible to readers who are new to this field or who come from related areas It is divided into 2 parts chapters 2 6 deal with internet based virtual worlds which have been widely used by the public chapters 7 10 deal with networked VR systems which have been primarily used in pilot studies and research Some chapters take the viewpoint of a participant observer whilst others take a more experimental approach and assess the results of relevant trials This book will be essential reading for anyone involved in developing using or researching virtual worlds and will also be of interest to students on courses such as VR and Computer mediated communication
