Aviators Luck:

Lucky Aviator Charles Dalglish, 2017-03-08 *Lucky Aviator* is a book for aviators, adventurers, and anyone who enjoys living life by the seat of their pants or just wishes they had. A life-long obsession with speed and flight has led Charles Dalglish, great nephew of Air Chief Marshal Sir Trafford Leigh Mallory, through some extraordinary situations. *Lucky Aviator* is the true story of a life peppered with pranks, explosions, and death-defying moments. Charles Dalglish's enthusiasm for flight began at an early age and has never faltered. At public school, his only interest was in creating a 750 Special After-engineering college, and many speeding adventures. It was not long before he had his own Autogiro. Forever speeding and breaking conventional rules, Charles was banned from driving. His solution: learn to fly a helicopter in a week and commute by air instead. With minimal instruction, Charles has flown Cessna, Auster, Jodel, and a Robinson helicopter, often in the most hazardous conditions and has cheated death on countless occasions. Always ready for a new challenge, Charles could not pass up the opportunity of rebuilding a Notar helicopter, the ultimate toy of anyone's dreams. The project turned out to be both thrilling and painful, as on his first flight, this uninsured 1,000,000 machine confronted a Wedgetail Eagle. The decision to sell up and take his young family to Australia seemed to pay dividends, as the Dalglish family took root in Little Hartley on the Great Western Highway. Selling Maules, the short take-off aircraft, gained Charles friends all over Australia, but life's journey once again experienced bumps, as the Council tried to destroy Charles's airstrip. The battles with the Council finally led to court, and the toll on Charles's health took him through the cancer experience.

Locus of Control, Risk Orientation, and Decision Making Among U.S. Army Aviators David Robert Hunter, 2009. This report was developed under the Small Business Innovative Research Program Phase I. The goal of the research was to develop a set of web-based prototype scales that would assess hazardous events, locus of control, safety-related attitudes, and risk orientation among U.S. Army Aviators. New measurement scales with an Army focus were developed that were modeled after civilian scales. These scales were: Army Hazardous Events Scale, Army Locus of Control Scale, Army Safety Attitudes Scale, and Army Aviation Scenarios Scale. In four surveys, the scales were administered to samples of Army Aviators, and their responses were used to conduct a preliminary evaluation of the scales. All the scales were found to exhibit good psychometric reliability, and several of the sub-scales from the measures were significantly correlated with self-reported accident involvement (DTIC). **Approach**, 1973. The naval aviation safety review. *Sunset*, 1918. *The Archaeology of the Royal Flying Corps* Melanie Winterton, 2022-10-07. Winterton's book is a good introductory effort on the haptic environment of World War I aviators and their personal artifacts. The Journal of the Air Force Historical Foundation Archaeology provides a fascinating insight into the lives of the aviators of the First World War. Their descriptions of the sensation of flying in the open cockpits of the primitive warplanes of the day and the artifacts that have survived from these first years of aerial combat give us a powerful sense of what their wartime service was like and chart the beginning of our modern understanding of aviation. But the subject hasn't been explored in any

depth before which is why Melanie Winterton's pioneering book is so timely. Hers is the first study of the trench art souvenirs and lucky mascots associated with the Royal Flying Corps which in an original way tell us so much about the experience of flying on the Western Front a century ago. Extensive quotations from the memoirs of these early airmen are combined with an analysis of the artifacts themselves. They convey something of the fear and anxiety the airmen had to grapple with on a daily basis and bring out the full significance of the poignant souvenirs they left behind. Pieces of crashed aeroplane wooden propellers, strips of linen, fragments of metal were recycled and circulated during the war and afterwards became the focus of attention in the domestic home. As Melanie Winterton demonstrates, these items connected the living with the deceased, which is why they are so strongly evocative even today.
