Saga Of The Nerve Growth Factor, The: Preliminary Studies, Discovery, Further Development Rita Levi-Montalcini, 1997-04-01 This volume is a collection of articles written by Nobel Laureate Rita Levi Montalcini and published from 1942 to 1995. Studies described in the first part set the stage for the discovery of a protein molecule which became known as the Nerve Growth Factor (NGF) described in detail in the second part. The NGF synthesized in minute amounts in all vertebrate tissues plays an essential role in the differentiation and survival of several nerve cell populations in the peripheral and central nervous system. The discovery of the NGF was defined by the Nobel Foundation as a milestone in developmental neurobiology and the author was awarded in 1986 with this prestigious award. Studies pursued in subsequent years and still in progress have unveiled other fundamental properties of the NGF described in the third part of this volume.

Developmental Biology and Cancer Gisele M. Hodges, Charles Rowlett, 2024-12-20 This book addresses possible analogies between cancer and developmental biology. An international group of experts provides a multidisciplinary approach allowing biological or clinical scientists involved with cancer research to integrate specific information from diverse areas. Five concepts of cancer are presented and developmental biology is reviewed at five levels. These are integrated in discussions of failure in organisation as a basis of cancer and its control. The book will be a valuable reference for both newcomers as well as experienced biological and clinical scientists. Hormonal Control of Growth Jack L. Kostyo, H. Maurice Goodman, 1999 **Control of Growth and Differentiation in Plants**, 1942 *Annual Report of the Biological Laboratory* Biological Laboratory (Cold Spring Harbor, N.Y.), 1929 *Proceedings of the Society for Experimental Biology and Medicine* Society for Experimental Biology and Medicine (New York, N.Y.), 1927 List of members in each volume *The control of growth and differentiation in plants* Philip F. Wareing, Irving D. J. Phillips, 1973 *Humoral Control of Growth And Differentiation* Joseph Lobue, 2012-12-02 Humoral Control of Growth and Differentiation Volume I Vertebrate Regulatory Factors is a part of two volume work that introduces the reader to humoral control of growth and differentiation in vertebrates. This volume gives emphasis on chemical messengers which have received relatively little attention in standard treatises on endocrine physiology for a number of reasons. Organized into three parts this book begins with the physiological significance of chaperones. This class of hormones is intimately associated with mitotic homeostasis as inhibitors of cell division. The book then looks into the aspects of blood cell formation and release as well as the humoral control of organs and tissue growth. This volume also includes chapters discussing the humoral changes occurring in diseases of the blood and other pathologic states. The humoral factors influencing lymphocyte proliferation in culture are also explained. Moreover this volume examines the effects of the more orthodox hormones upon skeletal growth and regeneration.
