Crabs Moon:

Crab Moon Ruth Horowitz, 2024-09-30 Like a perfect day at the beach Crab Moon leaves an indelible memory of a special adventure and a quiet message about doing our part to preserve earth's oldest creatures One June night under the full moon Daniel's mother wakes him up to see the extraordinary sight of horseshoe crabs spawning on the beach just as they have every spring for an awesome 350 million years But when Daniel returns in the morning he finds only one lonely crab marooned upside down in the sand Can he possibly save it Like a perfect day at the beach Crab Moon leaves an indelible memory of a special adventure between parent and child and a quiet message about doing our part to preserve even earth's oldest creatures Back matter includes a note about horseshoe crabs Crabs' Moon Guy N. Moonstruck Ernest Naylor, 2015-09-23 Throughout history the influence of the full Moon on humans and animals has featured in folklore and myths Yet it has become increasingly apparent that many organisms really are influenced indirectly and in some cases directly by the lunar cycle Breeding behaviour among some marine animals has been demonstrated to be controlled by internal circalunar biological clocks to the point where lunar daily and lunar monthly patterns of Moon generated tides are embedded in their genes Yet intriguingly Moon related behaviours are also found in dry land and fresh water species living far beyond the influence of any tides In *Moonstruck* Ernest Naylor dismisses the myths concerning the influence of the Moon but shows through a range of fascinating examples the remarkable real effects that we are now finding through science He suggests that since the advent of evolution on Earth which occurred shortly after the formation of the Moon animals evolved adaptations to the lunar cycle and considers whether if Moon clock genes occur in other animals they also might exist in us
