Contemporary Supervision:

The Contemporary Relational Supervisor Robert E. Lee, Thorana S. Nelson, 2013-07-18 The Contemporary Relational Supervisor is an empirically based academically sophisticated and learner friendly book on the cutting edge of couple and family therapy supervision. Appropriate for master's and doctoral level students as well as experienced clinicians who wish to learn about supervision, it emphasizes system and relational thinking and intervention while privileging the diversity of training system members, their realities, experiences, and interpretations of life. The authors are attuned throughout the text to how and where clinical training and services are provided and to whom, and provide detailed literature reviews for readers. These factors assist their discussion of the socio-historic development of the AAMFT supervision designation and the fundamentals, contexts, philosophy, relationships, and pragmatics of CFT supervision. They also discuss major models and approaches, evaluation, ethical and legal issues, and therapist development. Perhaps most important is their presentation of methods that help tailor and extend supervision practices to meet the clinical, institutional, and economic realities that CF therapists navigate. Readers are engaged by the discussions and exercises at the end of each chapter, which help them to feel more grounded in a topic, to have their own voices heard, and to be granted insight through experiencing multiple realities. This valuable reference prepares the next wave of cutting edge CFT supervisors: those who are knowledgeable, skilled, and realistically confident.

Contemporary Practices in Social Work Supervision Trish Hafford-Letchfield, Lambert Engelbrecht, 2020-06-05 This book is a timely review of scholarship in social work supervision, re-examining the state of knowledge, research, and practice, and asking if it is time for a new paradigm for the field. The contributors present a universal paradigm in social work around what we understand social work to be, not only through its practice of supervision but also what this contributes to the challenge of any dominant ideas or ideals about the supervision agenda in an increasingly globalized social work context. Capturing new developments from different regions of the world, the book shows how these can inform critical practice, professional development, and well-being, and have a wider impact on accountability, effectiveness, and work performance. The book will be appreciated by people needing or using services, novice or learner social workers, and those responsible for training or educating in supervision, knowledge, and skills, or preparing to take up this important role. With applications for both academic research and practitioner-based learning, this book will help to ensure the best quality and supportive practice within the workforce and community it serves. This book was originally published as a special issue of the *European Journal of Social Work*.

Lateiner, 1965 Basic text covering contemporary techniques of supervision **Contemporary Supervision** Norbert F. Elbert, Richard Disenza, 1985 **Paradigm Debates in Curriculum and Supervision** Linda Behar-Horenstein, Jeffrey Glanz, 2000-01-30 Paradigm debates in the educational research community are a frequent if not common occurrence How do paradigm debates in other educational fields such as curriculum and supervision shape educators understanding and practice In this volume it is suggested that educators adherence to particular views of curriculum and supervision is influential in guiding their beliefs and subsequent actions For example a widely accepted belief is that if an individual adopts a mechanistic view of the curriculum then s he is likely to deliver a curriculum grounded in pre established objectives and evaluate student achievement in relationship to formulated objectives Postmodernists contend that such educators are bound by rigid

bifurcation and a constrictive linear logic In supervision educational leaders who favor leadership styles comprised by autocratic behaviors tend to create school climates that favor a top down approach to human relationships Autocratic leaders rely on hierarchical organizational structures and styles that seek to instill compliance and subordination Yet prospective administrators who want concrete proposals put in practice find modern perspectives of supervision helpful In contrast postmodern supervisors allege that such leaders disallow the emergence of relevant and authentic relationships that might occur when conventional hierarchical structures are diminished and open lines of communication between teachers students administrators become normative The chapters in this book present an in depth analysis of how an individual s predisposition towards modern and postmodern views of curriculum and supervision are likely to influence 1 curriculum development 2 teaching styles 3 leadership styles 4 teacher and student evaluation and 5 the missions intrinsic to the creation of professional preparation programs that serve to promulgate existing practice or create a new order of teachers and administrator

The Supervisory Assemblage Elizabeth J. Done, 2014-09-26 In this unique book Liz Done undertakes an affective thought provoking nomadic inquiry into the doctoral process in which she engages with the writings of Deleuze Cixous Nietzsche Foucault and many others The paradox of learning as thoroughly relational but simultaneously implying the radical specificity of every learner's experience is unpacked in a text that is careful to explain the ideas and theories that are mobilised As a pedagogic intervention the book seeks to raise questions not answer them but ultimately offers a very powerful statement about the value of education as learning and its capacity to transform a life Academic production is revealed as a situated embedded relational and complex process The book's rhizomatic threads include transgressing linear neopositivist models doing something different with theory the importance of free experimentation and memory as both mobility and freedom Braidotti's nomadic subjectivity and Gannon's refusal to be pinned down in a bid for intellectual purity were also mobilised in the writing of this text It performs the inclusive potential of Deleuzian and feminist poststructuralist thought insisting on a scholarship that is about open inquiry adventure and learning as multiplicity It is untimely as Deleuze might say in its contemporary relevance
