

# B.F. SKINNER'S OPERANT CONDITIONING

Behaviour modification through Reinforcement and Punishment

## Positive Reinforcement

Involves presenting a pleasant stimulus after a desired behaviour, increasing the likelihood that the behaviour will occur again. For example, giving a child praise for cleaning their room reinforces that positive behaviour.

## Negative Reinforcement

Involves removing an unpleasant stimulus when a desired behavior occurs, thereby increasing the likelihood of that behaviour. An example is taking away a child's extra chores when they complete their homework on time.

## Positive Punishment

Involves administering an unpleasant stimulus to decrease a behaviour. For example, scolding a child for drawing on the walls aims to reduce that behaviour.

## Negative Punishment

Involves taking away a pleasant stimulus to decrease a behaviour. An example is removing a teenager's gaming privileges when they miss their curfew.

## Extinction

Involves the gradual weakening of a behaviour by stopping reinforcement or punishment. Over time, the behaviour decreases. For example, ignoring a child's tantrums may ultimately reduce their frequency.

*New Developments in Behavioral Research: Theory, Method and Application* Barbara C. Etzel, Judith M. LeBlanc, Donald M. Baer, 2020-09-10 Originally published in 1977 these examples of research and scholarly argument were collected in honor of Professor Sidney W Bijou In the language of academics they constitute a Festschrift a festival of scholarly writing performed to celebrate the career of a person who produced and stimulated others to produce exactly such contributions throughout a long valuable and productive professional history Since 1955 Dr Bijou had worked almost exclusively within the approach variously labelled as the functional analysis of behavior the experimental analysis of behavior operant conditioning or Skinnerian psychology From his point of view it seems clear the first of these labels was the correct one It was the principle of objective direct observable analysis that attracted him *Cognitive-Behavioral Interventions* Philip C.

Kendall, Steven D. Hollon, 2013-10-02 *Cognitive Behavioral Interventions Theory Research and Procedures* surveys a variety of areas to which cognitive behavioral strategies have been applied The various contributors represent some of the major innovators in the field Each has developed and systematically evaluated programs which apply sound empirically based procedures to cognitive and behavioral phenomena The opening chapter traces the short developmental history and describes the current professional environment of the cognitive behavioral movement The chapters that follow represent major contributions by the leading investigators across a number of areas of intervention Each chapter describes a summary of research in the respective area a description of the actual intervention procedures with supporting empirical data and a consideration of the theoretical foundations and potential implications associated with the intervention The chapter contents vary across three dimensions First the interventions range from those that focus on the acquisition of new capacities to those that deal with the control and modification of existing processes Second several chapters focus on adult populations several on child populations and some on both Finally whereas a number of the chapters deal with problems that have been areas of traditional clinical concern several others explore new and interesting applications for cognitive behavioral interventions
