**Live Young, Think Young, Be Young** Donald Vickery, Larry Matson, Carol Vickery, 2012-10-01 Why do we believe that aging is the cause of most of our problems as we get older? Age and aging actually have much less to do with it than you think. Live Young, Think Young, Be Young challenges our assumptions and beliefs about aging and provides a fresh new understanding of how and why we grow old. It will make you think differently about little things in your daily life that accelerate the three mega causes of getting old. In the end, this book is about courage and resilience: the courage to change what can be changed and the resilience to accept what can't be changed. Together, they provide a powerful plan for staying young in body, mind, and spirit.

**Sustainable Development Goals for Society Vol. 2** Godwell Nhamo, David Chikodzi, Kaitano Dube, 2021-06-26 This book profiles various cases that are emerging in addressing global challenges in the context of SDGs for society in the era of climate change and covers case studies of projects being undertaken to tackle biodiversity, food security, climate change, energy, and water security. The book is written by 37 authors and will appeal to various stakeholders including academics working within the identified thematic areas, policy planners, development agencies, governments, and United Nations agencies. The adoption of the Sustainable Development Goals (SDGs) in 2015 ushered a new era in the global development agenda as the world transitioned from the Millennium Development Goals (MDGs). The new era of SDGs that are all inclusive, unlike the MDGs with the focus now being on ensuring human success that is predicated on environmental protection. The year 2020 marked five years post the adoption of the SDGs with increased calls for stock-taking of progress made amid strong calls for a decade of action to accelerate the delivery of the SDGs by 2030. These calls have been louder now given the impact of the COVID-19 pandemic which reset the global economy and increased the intensity of extreme weather events across the world. Since climate change has emerged as one of the biggest threats to the achievement of the SDGs, there has been growing concern on its impact on biodiversity loss and the extinction of some species. There are also concerns regarding increased food insecurity at the household level in some parts of the world, particularly in Asia and Africa. With the demand for climate change action on the increase, there have also been growing calls for the big carbon emitters to drastically cut their emissions and invest in clean energy to save the planet by following development pathways making emissions stay under the 1.5°C increase in temperature.
