Creating Sense Texts And Realities:

Making Sense Ralf Hertel, 2021-07-26 Fiction is fascinating All it provides us with is black letters on white pages yet while we read we do not have the impression that we are merely perceiving abstract characters Instead we see the protagonists before our inner eye and hear their voices Descriptions of sumptuous meals make our mouths water we feel physically repelled by depictions of violence or are aroused by the erotic details of sexual conquests We submerge ourselves in the fictional world that no longer stays on the paper but comes to life in our imagination Reading turns into an out of the body experience or rather an in another body experience for we perceive the portrayed world not only through the protagonist's eyes but also through his ears nose tongue and skin In other words we move through the literary text as if through a virtual reality How does literature achieve this trick How does it turn mere letters into vividly experienced worlds This study argues that techniques of sensuous writing contribute decisively to bringing the text to life in the reader's imagination In detailed interpretations of British novels of the 1980s and 1990s by writers such as John Berger John Banville Salman Rushdie Jeanette Winterson or J M Coetzee it uncovers literary strategies for turning the sensuous experience into words and for conveying it to the reader demonstrating how we make sense in and of literature Both readers interested in the contemporary novel and in the sensuousness of the reading experience will profit from this innovative study that not only analyses the interest of contemporary authors in the senses but also pin points literary entry points for the sensuous force of reading

Creating Sense Desmond Allison, 1999 **Making Sense of Reality** Tia DeNora, 2014-09-22 What is reality and how do we make sense of it in everyday life Why do some realities seem more real than others and what of seemingly contradictory and multiple realities This book considers reality as we represent perceive and experience it It suggests that the realities we take as real are the result of real time situated practices that draw on and draw together many things technologies and objects people gestures meanings and media Examining these practices illuminates reality or rather our sense of it as always virtually real that is simplified and artfully produced This examination also shows us how the sense of reality that we make is nonetheless real in its consequences Making Sense of Reality offers students and educators a guide to analysing social life It develops a performance based perspective doing things with that highlights the ever revised dimension of realities and links this perspective to a focus on object relations and an ecological model of culture in action [The Realities of Reality - Part II: Making Sense of Why Modern Science Advances \(Volume 1\)](#) Fritz Dufour, MBA, DESS, 2018-09-19 This Volume 1 of Part II considers the factors that make science progress It lays out the differences between normal science and pseudoscience by showing the importance of the scientific method in the advancement of science It introduces the concept of Truth in science by raising the point that even though truth is based on the scientific method can science be true Can it depict reality The author focuses on modern science which he thinks was born thanks to the Scientific Revolution which started with Galileo Galilei and led to the Industrial Revolution The impacts of the latter is

analyzed in light modernism modernization and modernity all three linked to scientific progress The book also talks about the Newtonian scientific leap by analyzing particularly the then social and political fabrics of England and Albert Einstein by showing how he changed history According to the author our very physical world can help us understand scientific progress So he explains among other things the structure of atoms and molecules the role of physics in the understanding of our universe Quantum Mechanics and the importance of Higgs Boson On the other hand the book is a stunning revelation of how important information is to scientific progress To make his point the author first talks about John Vincent Atanasoff as the Father of computer thanks to the invention of his ABC computer and then Alan Turing as the Father of modern computer thanks to his Turing Test and his views on Artificial Intelligence Both men played a momentous role in the Digital Revolution and in the Information Age according to the book Finally the author talks about nanotechnology which explores the world of small meaning at the atomic and the molecular levels and is an inescapable tool in the molecular biology revolution which itself is an important factor in scientific progress and in transhumanism or human enhancement defined as the ideology according to which man can surpass his present state by improving his genetic material

Making Sense of Health, Illness and Disease Peter Twohig, Vera Kalitzkus, 2004 Health illness and disease are topics well suited to interdisciplinary inquiry This book brings together scholars from around the world who share an interest in and a commitment to bridging the traditional boundaries of inquiry We hope that this book begins new conversations that will situate health in broader socio cultural contexts and establish connections between health illness and disease and other socio political issues This book is the outcome of the first global conference on Making Sense of Health Illness and Disease held at St Catherine s College Oxford in June 2002 The selected papers pursue a range of topics from the cultural significance of narratives of health illness and disease to healing practices in contemporary society as well as patients illness experiences Researchers and health care practitioners now live in the age of interdisciplinarity which has transformed both health care delivery and research on health The essays in this collection transcend the traditional boundaries of biomedicine and draw attention to the many ways in which health is embedded in socio cultural norms and how these norms in turn shape health practices and health care This volume is of interest not only to researchers but also to those delivering health care
