Comparative Politics

Judith Bara, Mark Pennington, 2009-03-19 Bara and Pennington's edited volume successfully fills a huge void in the market for introductory textbooks to comparative politics which previously offered either descriptions of political processes and systems or overviews of the methodology of comparative analysis By applying major political science theories to overviews of the core elements of political systems the authors both enhance our understanding of these elements and provide readers an excellent introduction to comparative explanation Dr David Howarth University of Edinburgh What is distinctive about this authoritative and comprehensive book on comparative politics is the way in which it is underpinned throughout by a theoretical analysis centred on a new institutionalist approach Professor Wyn Grant University of Warwick Comparative Politics takes a fresh and original approach to the field it examines the role of structures rules and norms in regulating the individual and collective behaviour of political actors Each chapter provides a critical bibliography and key questions which will be particularly useful for students approaching Comparative Politics for the first time Altogether this is a comprehensive and useful read which I warmly recommend Ian Budge Professor Emeritus Professor of Government University of Essex This is a most useful book Teachers of comparative politics often scramble around with out of date textbooks and photocopies of more or less compatible articles Here is a new book that gives an up to date comprehensive and systematic introduction to the major strands of institutional thought and applies these to the major institutions processes and policy areas It will be a great help for many of us academics and students alike Peter Kurrild Klitgaard Professor of Comparative Politics University of Copenhagen This book provides a distinctive new introduction to the study of comparative politics at undergraduate level Rich in case study material and global in coverage Comparative Politics sets out the basic theoretical and methodological foundations for studying different political systems as well as the key structures and actors of which they are comprised Part One explores the nature of comparative methodology and introduces students to the major theoretical paradigms that seek to explain the operation of institutions in democratic states and facilitate comparison across different political systems Part Two examines the institutional structures of the modern state outlining the key features such as the electoral systems and territorial and functional divisions of government across a range of modern states Part Three analyzes the role of key actors such as voters and parties interest groups and social movements the bureaucracy and the judiciary This book will be an

essential primer for students on first year courses in comparative government and politics as well as introductory courses in political science concepts and methods Judith Bara is Senior Lecturer in Politics at Queen Mary University of London and Research Fellow in Government University of Essex David S Bell is Professor of French Government and Politics and Head of Social Studies and Law at the University of Leeds Jocelyn Evans is Reader in Politics at the European Studies Research Institute University of Salford Catherine Needham is Lecturer in Politics at Queen Mary University of London Brendan O Duffy is Senior Lecturer in Politics at Queen Mary University of London Mark Pennington is Senior Lecturer in Politics at Queen Mary University of London David Robertson is Professor of Politics University of Oxford and Vice Principal St Hugh s College Oxford Comparative Politics ,2005 *Comparative Politics* ,1981 **New Directions In Comparative Politics** Douglas A. Groth,1971 No Child Left Behind and the Transformation of Federal Education Policy, 1965-2005 Patrick J. McGuinn,2006 Education is intimately connected to many of the most important and contentious questions confronting American society from race to jobs to taxes and the competitive pressures of the global economy have only enhanced its significance Elementary and secondary schooling has long been the province of state and local governments but when George W Bush signed into law the No Child Left Behind Act in 2002 it signaled an unprecedented expansion of the federal role in public education This book provides the first balanced in depth analysis of how No Child Left Behind NCLB became law Patrick McGuinn a political scientist with hands on experience in secondary education explains how this happened despite the country s long history of decentralized school governance and the longstanding opposition of both liberals and conservatives to an active reform oriented federal role in schools His book provides the essential political context for understanding NCLB the controversies surrounding its implementation and forthcoming debates over its reauthorization how the struggle to define the federal role in school reform took center stage in debates over the appropriate role of the government in promoting opportunity and social welfare He places the evolution of the federal role in schools within the context of broader institutional ideological and political changes that have swept the nation since the 1965 Elementary and Secondary Education Act chronicles the concerns raised by the 1983 report A Nation at Risk and shows how education became a major campaign issue for both parties in the 1990s McGuinn argues that the emergence of swing issues such as education can facilitate major policy change even as they influence the direction of wider political debates and partisan conflict McGuinn traces the Republican shift from seeking to eliminate the U S Department of Education to embracing federal leadership in school reform then details the negotiations over NCLB the forces that shaped its final provisions and the ways in which the law constitutes a new federal education policy regime against which states have

now begun to rebel and that only by understanding the unique dynamics of national education politics will reformers be able to craft a more effective national role in school reform

Environmental Politics in Japan, Germany, and the United States Miranda A. Schreurs, 2003-03-13 A decade of climate change negotiations almost ended in failure because of the different policy approaches of the industrialized states Japan Germany and the United States exemplify the deep divisions that exist among states in their approaches to environmental protection Germany is following what could be called the green social welfare state approach to environmental protection which is increasingly guided by what is known as the precautionary principle In contrast the US is increasingly leaning away from the use of environmental regulations towards the use of market based mechanisms to control pollution and cost benefit analysis to determine when environmental protection should take precedence over economic activities Internal political divisions mean that Japan sits uneasily between these two approaches Miranda A Schreurs uses a variety of case studies to explore why these different policy approaches emerged and what their implications are examining the differing ideas actors and institutions in each state

Comparative Politics Gregory S. Mahler, 2003 An exceptionally clear jargon free writing style and an emphasis on political institutions and behavior rather than on abstract conceptual frameworks make this volume consistently more accessible to readers than most others on comparative politics It features both across national approach permitting readers to develop a truly comparative understanding of the types of institutions e g constitutions executives legislatures political parties etc as well as a country by country approach that examines those institutions within the context of eight different countries enabling readers to see how all the pieces fit together The volume analyzes comparative political analysis constitutions and ideologies political development and political economics legislatures and legislative structures the executive judiciary and the legal order interest groups political parties and the individual and the political environments of The British French German Japanese Canadian Mexican Nigerian and Russian political systems For those interested in a comprehensive look at comparative politics
