cultural variability of human emotion Silvan Tomkins 1911 1991 was one of the most radical and imaginative psychologists of the twentieth century In *Affect Imagery Consciousness* a four volume work published over the last thirty years of his life Tomkins developed an ambitious theory of affect steeped in cybernetics and systems theory as well as in psychoanalysis ethology and neuroscience The implications of his conceptually daring and phenomenologically suggestive theory are only now in the context of postmodernism beginning to be understood With *Shame and Its Sisters* editors Eve Kosofsky Sedgwick and Adam Frank make available for the first time an engaging and accessible selection of Tomkins s work Featuring intensive examination of several key affects particularly shame and anger this volume contains many of Tomkins s most haunting diagnostically incisive and theoretically challenging discussions An introductory essay by the editors places Tomkins s work in the context of postwar information technologies and will prompt a reexamination of some of the underlying assumptions of recent critical work in cultural studies and other areas of the humanities The text is also accompanied by a biographical sketch of Tomkins by noted psychologist Irving E Alexander Tomkins s longtime friend and collaborator *Building* ,1926
