Walker, 2003-05-14 Understanding Organization Through Culture and Structure Relational and Other Lessons From the African American Organization presents an innovative view of organizations and the communication processes that constitute them Arguing that human beings are communicatively embedded in their cultures Anne Maydan Nicotera and Marcia J Clinkscales working with Felicia R Walker examine issues concerning task and relational orientations and the ways they and other cultural dimensions connect with organizational structure and function for predominantly African American organizations Utilizing the results of their own research on organizations they develop a set of humanistically based models that illustrate how hidden cultural processes suffuse organizational life and are manifest through communication Emphasizing the development of alternative theories and models of organizing which are rooted in African American culture such as team based versus hierarchy based interactions this book explores such organizational functions as leadership and management power authority and control communication and interpersonal dynamics and cultural identity and human development Applying their findings in a broader analysis of contemporary practices in organizational restructuring the authors present research that serves as the foundation for generating several emergent models with significant implications for organizational systems Understanding Organization Through Culture and Structure stimulates and inspires current researchers of organizational communication and is certain to raise greater awareness of the operation of culture in organizing The text is intended for scholars and students in organizational communication management organizational psychology African studies and related areas

Black Women, Agency, and the New Black Feminism Maria del Guadalupe Davidson, 2017-02-17 The powerful Beyoncé formidable Rihanna and the incalculable Nikki Minaj Their images lead one to wonder are they a new incarnation of black feminism and black women's agency or are they only pure fantasy in which instead of having agency they are in fact the products of the forces of patriarchy and commercialism More broadly one can ask whether black women in general are only being led to believe that they have power but are really being drawn back into more complicated systems of exploitation and oppression Or are black women subverting patriarchy by challenging notions of their subordinate and exploitable sexuality In other words who is playing who *Black Women Agency and the New Black Feminism* identifies a generational divide between traditional black feminists and younger black women While traditional black feminists may see for example sexualized images of black women negatively and as an impediment to progress younger black women tend to embrace these new images and see them in a positive light After carefully setting up this divide this enlightening book will suggest that a more complex understanding of black feminist agency needs to be developed one that is adapted to the complexities faced by the younger generation in today's world Arguing the concept of agency as an important theme for black feminism this innovative title will appeal to scholars teachers and students interested in black feminist and feminist philosophy identity construction subjectivity and agency race gender and class

Middletown Valley Robert P. Savitt, 2012 The towns of Maryland's Middletown Valley bear the imprints of some of the most telling events in early American history the French and Indian War the Revolutionary War the Civil War and the building of America's first national road Andrew Jackson the nation's seventh president described the Middletown Valley as one of the most favored and delightful spots on earth The largest town picturesque Middletown was the scene of intense activity during the Civil War Mountaintop Braddock Heights became a resort getaway after the construction of a trolley line in 1896 Myersville was settled in the 1700s by industrious immigrants who set up a bustling community of farmers craftsmen and merchants Wolfsville an appealing old settlement near the Mason Dixon Line was occupied by Confederate forces in 1864 The charming little village of Burkittsville sits beneath a mountain that boasts the world's only monument to fallen war correspondents Using images gathered from local families historical societies and libraries *Middletown Valley* explores the unique history and daily lives of the people who have lived and worked in this magical valley

The Aesthetics of Toni Morrison Connor, Marc C., 2010-01-06 Nobel laureate Toni Morrison's novels have almost exclusively been examined as sagas illuminating history race culture and gender politics This gathering of eight essays by top scholars probes Morrison's novels and her growing body of nonfiction and critical work for the complex and

potent aesthetic elements that have made her a major American novelist of the twentieth century Through traditional aesthetic concepts such as the sublime the beautiful and the grotesque through issues of form narrative and language and through questions of affect and reader response the nine essays in this volume bring into relief the dynamic and often overlooked range within Morrison s writing Employing aesthetic ideas that range from the ancient Greeks to contemporary research in the black English oral tradition *The Aesthetics of Toni Morrison* shows the potency of these ideas for interpreting Morrison s writing This is a force Morrison herself has often suggested in her claims that Greek tragedy bears a striking similarity to Afro American communal structures At the same time each essay attends to the ways in which Morrison also challenges traditional aesthetic concepts establishing the African American and female voices that are essential to her sensibility The result is a series of readings that simultaneously expands our understanding of Morrison s work and also provokes new thinking about an aesthetic tradition that is nearly 2 500 years old These essays offer a rich complement to the dominant approaches in Morrison scholarship by revealing aspects of her work that purely ideological approaches have obscured or about which they have remained oddly silent Each essay focuses particularly on the relations between the aesthetic and the ethical in Morrison s writing and between the artistic production and its role in the world at large These relations show the rich political implications that aesthetic analysis engenders By treating both Morrison s fiction and her nonfiction the essays reveal a mind and imagination that have long been intimately engaged with the questions and traditions of the aesthetic domain The result is a provocative and original contribution to Morrison scholarship and to scholarship in American letters generally
