Background

The Advanced Lighting Guidelines were first developed in 1991 by the California Energy Commission to dispel myths about new and emerging advanced lighting technologies. The second edition was published in 1993 by a partnership of the California Energy Commission, the Electric Power Research Institute and the U. S. Department of Energy. In 2001, the New Buildings Institute published the third edition of the Advanced Lighting Guidelines through a multi-client agreement.

The 2003 Edition maintains the wealth of information contained in the 2001 Edition and provides an updated "Applications" chapter, including an array of visual depictions of lighting design solutions for offices, conference rooms, grocery stores, big box and boutique retail stores, school classrooms and gas stations.
