## **Aid Architecture:**

**Development Cooperation** S. Klingebiel, 2013-12-01 The aims of and motives for development cooperation have changed significantly in recent times Besides pursuing short and longer term objectives in their own economic foreign policy and other interests donors usually have a recognisable and genuine interest in assisting countries in their processes of development

**Empirical Evidence on the New International Aid Architecture** Stijn Claessens, Danny Cassimon, Bjorn Van Campenhout, 2007-12 We study how 22 donors allocate their bilateral aid among 147 recipient countries over the 1970-2004 period to investigate whether changes in the international aid architecture at the international and country level have led to changes in behavior We find that after the fall of the Berlin wall and especially in the late nineties bilateral aid responds more to economic need and the quality of a recipient country's policy and institutional environment and less to debt size and colonial linkages Importantly we find that when a country uses a PRSP and passes the HIPC decision point the perverse effect of large bilateral and multilateral debt shares on aid flows is reduced suggesting less defensive lending Overall it appears international aid architecture changes have led to more selectivity in aid allocations The specific factors causing these changes remain unclear however Furthermore there remain large differences among donors in selectivity that appear to relate to donors own institutional environments Together this suggests that further reforms will have to be multifaceted

**New Asian Approaches to Africa: Rivalries and Collaborations** Takuo Iwata, 2020-03-03 The 21st century has seen an increase in the presence and influence of Asian governments firms and other stake holders in Africa With the changing times changes in approaches to Africa by four major Asian countries China India Japan and South Korea have taken place By tracing the history between these Asian countries and African countries this collection reflects on the new phases of Asian Approaches to Africa Composed by authors who are not only experienced expert scholars of African Studies but also prominent specialists on African policies of Asian countries this collection focuses on the official development assistance ODA as well as other crucial issues and actors such as business civil society and media to explore the new Asian approaches to Africa in a comprehensive manner Organised into three sections this collection explores the experiences of the forums conferences or summits for Africa's development hosted by four major Asian countries reflects on Asian cultural influence in Africa and highlights new phases of Asian approaches to Africa This book looks to the future collaboration of Asian actors partners working in with Africa rather than exaggerating rivalries and disputes in order to grasp the potentialities and challenges in the relationship between the two regions an emerging and ongoing agenda that we will encounter further in the coming years This book will be of interest to students researchers and professors in universities as well as research institutes on Asian and African Studies It will also be of value to journalists and government officials particularly diplomats

*The Quest for a New International Aid Architecture* Hatice Karahan, 2020-07-31 This book examines Turkey's success within international development cooperation and how this could create a framework for a new

international aid architecture Turkey has become a world leader in humanitarian assistance and shared an extraordinary burden in official development assistance ODA Its achievements are used to highlight the global failure to meet aid commitments and the increasingly permanent humanitarian problems seen in certain regions A particular focus is given to Turkey s diplomatic and humanitarian actions its contribution to regional stability and development and creating a holistic aid perspective The book aims to provide the reader with an understanding of Turkey s significant value added contribution to the international aid architecture gives an outline for international cooperation and contributes to ongoing discussions within development economics political science and international relations

**Design and the Vernacular** Paul Memmott, John Ting, Tim O'Rourke, Marcel Vellinga, 2023-11-16 Design and the Vernacular explores the intersection between vernacular architecture local cultures and modernity and globalization focussing on the vast and diverse global region of Australasia and Oceania The relevance and role of vernacular architecture in contemporary urban planning and architectural design are examined in the context of rapid political economic technological social and environmental changes including globalization exchanges of people finance material culture and digital technologies Sixteen chapters by architects designers and theorists including Indigenous writers explore key questions about the agency of vernacular architecture in shaping contemporary building and design practice These questions include How have Indigenous building traditions shaped modern building practices What can the study of vernacular architecture contribute to debates about sustainable development And how has vernacular architecture been used to argue for postcolonial modernisation and nation building and what has been the effect on heritage and conservation Such questions provide valuable case studies and lessons for architecture in other global regions and challenge assumptions about vernacular architecture being anachronistic and static instead demonstrating how it can shape contemporary architecture nation building and cultural identities

**Developmentality** Jon Harald Sande Lie, 2015-09-01 Drawing on ethnographic fieldwork within the World Bank and a Ugandan ministry this book critically examines how the new aid architecture recasts aid relations as a partnership While intended to alter an asymmetrical relationship by fostering greater recipient participation and ownership this book demonstrates how donors still seek to retain control through other indirect and informal means The concept of developmentality shows how the World Bank s ability to steer a client s behavior is disguised by the underlying ideas of partnership ownership and participation which come with other instruments through which the Bank manipulates the aid recipient into aligning with its own policies and practices

**Paths between Peace and Public Service** Jürgen René Blum, Marcos Ferreiro-Rodríguez, Vivek Srivastava, 2018-12-28 Building a capable public service is fundamental to postconflict state building Yet in postconflict settings short term pressures often conflict with this longer term objective To ensure peace and stabilize fragile coalitions the imperative for political elites to hand out public jobs and better pay to constituents dominates merit Donor financed projects that rely on technical assistants and parallel structures rather than on government systems are often the primary

vehicle for meeting pressing service delivery needs What then is a workable approach to rebuilding public services postconflict Paths between Peace and Public Service seeks to answer this question by comparing public service reform trajectories in five countries Afghanistan Liberia Sierra Leone South Sudan and Timor Leste in the aftermath of conflict The study seeks to explain these countries different trajectories through process tracing and structured focused methods of comparative analysis To reconstruct reform trajectories the report draws on more than 200 interviews conducted with government officials and other stakeholders as well as administrative data The study analyzes how reform trajectories are influenced by elite bargains and highlights their path dependency shaped by preconflict legacies and the specifics of the conflict period As the first systematic study on postconflict public service reforms it identifies lessons for the future engagement of development partners in building public services Rebuilding the bureaucracy is possibly the most underappreciated policy and research question in fragile states today This is one of the most politically astute and thoughtful books I ve read on postconflict policy making of any kind Christopher Blattman Ramalee E Pearson Professor of Global Conflict Studies Pearson Institute for the Study and Resolution of Global Conflicts Harris Public Policy University of Chicago Rebuilding states after conflict is the greatest challenge in development today And yet we know precious little about the actual experience of countries that have tried to rebuild their civil service and restore public services This is a monumental study based on extensive empirical data and field based research across multiple cases that actually opens up the black box of state building in conflict affected countries It should be required reading for anyone who takes on this extraordinary challenge Joel S Hellman Dean Edmund A Walsh School of Foreign Service Georgetown University There isn t a more pressing problem in international development than formulating practical strategies for building institutions in fragile states This book is a remarkable distillation of the frontline experiences of the World Bank in tackling this task Finally we have the basis for an empirically grounded assessment of what works and why Unputdownable James Robinson Reverend Dr Richard L Pearson Professor of Global Conflict and University Professor Institute Director Pearson Institute for the Study and Resolution of Global Conflicts Harris Public Policy University of Chicago [The Evidence and Impact of Financial Globalization](#) ,2012-12-31 The sharp realities of financial globalization become clear during crises when winners and losers emerge Crises usher in short and long term changes to the status quo and everyone agrees that learning from crises is a top priority The Evidence and Impact of Financial Globalization devotes separate articles to specific crises the conditions that cause them and the longstanding arrangements devised to address them While other books and journal articles treat these subjects in isolation this volume presents a wide ranging consistent yet varied specificity Substantial authoritative and useful these articles provide material unavailable elsewhere Substantial articles by top scholars sets this volume apart from other information sources Rapidly developing subjects will interest readers well into the future Reader demand and lack of competitors underline the high value of these reference works [Emerging Powers, Development Cooperation and](#)

South-South Relations Chithra Purushothaman,2020-10-24 This book analyses the role of emerging powers as a development assistance providers and the nature of their development cooperation their behaviour motives and markedly their changing identities in international relations With their growing economic and political clout emerging powers are using economic instruments like foreign aid to ensure their position in the international system that is going through power shifts By comparing three major emerging economies of the Global South Brazil India and China this book would explore how emerging powers are changing the international aid architecture that is created and dominated by the traditional donors

**Global Financial Integration Thirty Years On** Geoffrey R. D. Underhill,Jasper Blom,Daniel Mügge,2010-09-02 Early in the new millennium it appeared that a long period of financial crisis had come to an end but the world now faces renewed and greater turmoil This 2010 volume analyses the past three decades of global financial integration and governance and the recent collapse into crisis offering a coherent and policy relevant overview State of the art research from an interdisciplinary group of scholars illuminates the economic political and social issues at the heart of devising an effective and legitimate financial system for the future The chapters offer debate around a series of core themes which probe the ties between public and private actors and their consequences for outcomes for both developed markets and developing countries alike The contributors argue that developing effective legitimate financial governance requires enhancing public versus private authority through broader stakeholder representation ensuring more acceptable policy outcomes Global Monitoring Report 2008 World Bank,2008-04-14 Global Monitoring Report 2008 the fifth in an annual series is essential reading for those who wish to follow the global development agenda and debate in 2008 The year marks the midpoint toward the 2015 deadline for achieving the Millennium Development Goals MDGs It is also an important year to work toward a consensus on how the world is going to respond to the challenge of climate change building on the foundation laid at the Bali climate change conference in December 2007 The report spans this agenda It provides a comprehensive assessment of progress toward the MDGs and related policies and actions It addresses the challenge of climate change and environmental sustainability and assesses its implications for development The report s assessment of MDGs at midpoint presents a mixed picture one of both significant progress and formidable challenges The first MDG reducing extreme poverty by half is likely to be met at the global level thanks to a remarkable surge in global economic growth over the past decade But on current trends the human development MDGs are unlikely to be met Prospects are gravest for the goals of reducing child and maternal mortality but shortfalls are also likely in the primary school completion nutrition and sanitation MDGs The potential effects of climate change compound the challenge of achieving the development goals and sustaining progress The report s messages are clear urgent action is needed to help the world get back on track to achieve the MDGs and urgent action is also needed to combat climate change that threatens the well being of all countries but particularly of poor countries and poor people The goals of development and environmental sustainability are closely related and the paths to those goals have
