Military Construction Appropriations United States. Congress. House. Committee on Appropriations. Subcommittee on Military Construction Appropriations, 1964  
Military Construction Appropriations for 1964 United States. Congress. House. Committee on Appropriations, 1963

**Construction** Austin Thomas Byrne, 1899

**Inspection of the Materials and Workmanship Employed in Warm Disease Theory: Wen Bing Xue** Wang Bing, 2003

In Chinese medicine there are four classics that all serious students are required to study These include the Classic of Internal Medicine Nei Jing Treatise on Cold Damage Shang Han Lun Synopsis of the Golden Chamber Jin Kui Yao Lue and Warm Disease Theory Wen Bing Xue Warm Disease Theory is the most modern of the four classics Although referred to as a classic in this context the term classic means an area of classical study rather than a single classical text Even though there are numerous references to warm diseases in very ancient texts warm disease was not developed as an independent system until the Qing dynasty There were several schools of warm disease dating from the Ming and Qing dynasties but until the time this text was written there had never been an attempt to integrate their ideas into an overview The five medical experts who most significantly influenced the development of Warm Disease theory were Wu You Ke Ye Tian Shi Xue Sheng Bai Wu Ju Tong and Wang Meng Ying The first of these Wu You Ke lived in the Ming dynasty He put forward the theory of pestilence qi li qi which explained the role of certain infectious factors in the etiology of communicable diseases His was the first theory to assert that warm pathogens enter the body through the mouth and nose He published these ideas in his Treatise on Acute Epidemic Warmth Wen Yi Lun The other four medical experts all lived and wrote during the Qing dynasty Dr Ye Tian Shi introduced the theory that warm diseases develop and transmit through four aspects namely the defense qi construction and blood aspects His lectures and teachings were edited by his disciples and published in the Treatise on Warm Heat Wen Re Lun Xue Sheng Bai concentrated on discussing damp heat disease factors He clearly explained that damp heat usually occurs from a combination of external yang brightness and internal greater yin factors affecting each other He published his ideas in his Detailed Analysis of Damp Heat Shi Re Tiao Bian Dr Wu Ju Tong expanded on the ideas of Dr Ye Tian Shi by developing a system of differential diagnosis based on the pathological changes in the triple burner He summarized his findings and published them in his Detailed Analysis of Warm Diseases Wen Bing Tiao Bian Dr Wang Meng Ying developed insights on the cause of warm fevers their symptoms and their treatment methods by applying the theories set down in the Classic of Internal Medicine and Treatise on Cold Damage to the views of his renowned contemporaries He published his ideas in several books the most important of which is Warm Disease Latitudes and Longitudes Wen Re Jing Wei However even these great Ming and Qing dynasty doctors of warm disease on whose works this text is based only had partial insights their views were relatively fragmentary Warm Disease Theory is the first text to integrate the views of every school the first to undertake a comprehensive discussion of the foundations of warm disease theory and the clinical treatment of warm diseases It is in fact

such a valuable source of theoretical and therapeutic information that it is often considered a modern classic The text is arranged in two sections The first introduces all the basic information about warm disease including its history disease causes pattern identification and general diagnostic and treatment methods The second section devotes a separate chapter to each of the different warm diseases It deals with the disease factors clinical manifestations pulses and treatments in the warm diseases of the four seasons including wind warmth spring warmth summerheat warmth damp warmth latent summerheat warmth autumn dryness and warm toxins In each of these warm diseases the disease concepts etiologies pathologies main points of diagnosis and treatment policies are discussed first then the patterns and treatments of their characteristic disease transformations are explained
