Beyond Civilization Harry Redner, 2013-01-31 For Harry Redner the phrase beyond civilization refers to the new and unprecedented condition the world is now entering specifically the condition commonly known as globalization Redner approaches globalization from the perspective of history and seeks to interpret it in relation to previous key stages of human development His account begins with the Axial Age 700-300 BC and proceeds through Modernity after AD 1500 to the present global condition What is globalization doing to civilization In answering this question Redner studies the role played by capitalism the state science and technology He aims to show that they have had a catalytic impact on civilization through their reductive effect on society culture and individualism However Redner is not content to diagnose the ills of civilization he also suggests how they might be ameliorated by cultural conservation Above all it is to the problem of decline in the higher forms of literacy that he addresses himself for it is on the culture of the book that previous civilizations were founded This study will be of interest to sociologists historians and social and political theorists Its style makes it accessible also to general readers interested in civilization past present and future

Politics, Ethics and Culture in Our Time Harry Redner, 2023-01-30 Global capitalism is effecting changes in human life as momentous as those that occurred during the Neolithic Revolution the Axial Age 700-300 BC and the modern era post 1500 when industrial capitalism state power and science reshaped the civilized world The transformation is paradoxical however Science and technology ensure material progress but the market promotes cultural obsolescence and erodes belief in the Enlightenment ideals that inspired the quest for progress In Western democracies liberty and equality are proving irreconcilable citizens becoming demoralized fraternity fractured meanwhile despotic Eurasian states are recycling old faiths and concocting neo imperialist ideologies These contradictions must be confronted if the cultural values that sustain civilized life are to be conserved

Navigating Modernity Albert J. Paolini, 1999 Paolini is concerned with the connections among postcolonialism globalization and modernity and he offers one of the first detailed statements of those connections to be undertaken in the field of IR Focusing on the Third World and particularly sub-Saharan Africa he questions dominant notions of identity and subjectivity in the social sciences

Brave New World Aldous Huxley, 1991-01-01 The astonishing novel Brave New World originally published in 1932

presents Aldous Huxley's vision of the future of a world utterly transformed through the most efficient scientific and psychological engineering people are genetically designed to be passive and therefore consistently useful to the ruling class. This powerful work of speculative fiction sheds a blazing critical light on the present and is considered to be Huxley's most enduring masterpiece. Following *Brave New World* is the nonfiction work *Brave New World Revisited*, first published in 1958. It is a fascinating work in which Huxley uses his tremendous knowledge of human relations to compare the modern day world with the prophetic fantasy envisioned in *Brave New World*, including threats to humanity such as overpopulation, propaganda, and chemical persuasion. *Advanced Readings & Communicative Activities for Oral Proficiency* Sandra Costinett, 1991

The Dial, 1905 **Brave New World** Aldous Huxley, 2022-11-13 Aldous Huxley's *Brave New World* presents a chilling vision of a dystopian future characterized by the pervasive influence of technology and state control over individuals. Written in 1932, this novel employs a satirical yet cautionary tone, utilizing rich, ironic prose to explore the loss of individuality in a society driven by consumerism, genetic engineering, and hedonism. Huxley crafts a technologically advanced world where human beings are conditioned from birth to embrace a predetermined social order, raising profound ethical questions about freedom, happiness, and the cost of progress. Aldous Huxley, a member of a prominent scientific family, was deeply influenced by both the Enlightenment ideals of progress and the emerging anxieties of the early 20th century. His exposure to the early theories of psychology, biology, and the effects of totalitarianism shaped his critical perspective on modern civilization. *Brave New World* serves as both a product of its time and a prophetic warning, reflecting Huxley's concerns about the dehumanizing potential of technological advancement and the inherent risks of sacrificing individuality for societal stability. This landmark work is an essential read for anyone interested in the interplay between technology, society, and human values. Huxley's masterful narrative invites readers to reflect on the moral dilemmas of contemporary life, making it a timeless exploration of the balance between progress and humanity. Engage with *Brave New World* to apprehend its enduring relevance in an age increasingly dominated by technological advancement.
