Aging Population:

The Aging Population in the Twenty-First Century National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on National Statistics, Panel on Statistics for an Aging Population, 1988-02-01 It is not news that each of us grows old What is relatively new however is that the average age of the American population is increasing More and better information is required to assess plan for and meet the needs of a graying population The *Aging Population in the Twenty First Century* examines social economic and demographic changes among the aged as well as many health related topics health promotion and disease prevention quality of life health care system financing and use and the quality of care especially long term care Recommendations for increasing and improving the data available as well as for ensuring timely access to them are also included *A Generation of Change* Jacob S. Siegel, 1993-02-18 *A Generation of Change* is an exceptional study of the nation's elderly a population that has undergone profound changes in the years since World War II As modern medicine extends the average life span and the baby boom generation begins to approach middle age the number of older Americans is expected to more than double in the next century Currently 75 percent of U S health care expenditures go toward the elderly But as national trends toward early retirement and low birthrate continue an aging American population could face crises in meeting their financial and physical needs According to Jacob S Siegel in *A Generation of Change* astute public planning must be informed by an understanding of the demographic social and economic characteristics of the older population as it is today and as it will be in the coming years Siegel employs census and survey data from 1950 through the mid 1980s to describe a population constantly shifting in its ethnic and gender composition geographic distribution marital and living arrangements health employment and economic status Surprisingly there is tremendous disparity in the quality of life among the elderly Although their average poverty rate is below that of the general population there are dramatic levels of poverty among older women who are far more likely than men to live alone or in institutions As the elderly progress from the young old to the aged old those over 85 sharp differences emerge as income and employment decrease and degrees of chronic illness increase In addition residential location influences the quality of health care and public assistance available to the elderly an effect that may account for the marked migration of older people to Florida and Arizona Siegel analyzes the full range of characteristics for this heterogeneous population and through comparisons with other age groups as well as with the elderly of the previous decades portrays the crucial influence of social and economic conditions over the life course on the quality of later life With our elderly population growing more numerous and long lived accurate information about them is increasingly essential *A Generation of Change* will serve as a valuable resource for policymakers seeking more effective solutions in critical areas such as housing long term health care and the funding of Social Security and retirement programs A Volume in the Russell Sage Foundation Census Series [Improving Data on America's Aging Population](#) Committee on National Statistics, Commission on Behavioral and

Social Sciences and Education, Division of Behavioral and Social Sciences and Education, National Research Council, 1996-12-04 The Committee on National Statistics and the Committee on Population at the request of the NIA convened a workshop in March 1996 to discuss data on the aging population that address the emerging and important social economic and health conditions of the older population The purposes of the workshop were to identify how the population at older ages in the next few decades will differ from the older population today to understand the underlying causes of those changes to anticipate future problems and policy issues and to suggest future needs for data for research in these areas The scope of the workshop was broader than that of the 1988 CNSTAT report including not only data on health and long term care but also actuarial economic demographic housing and epidemiological data needs for informing public policy

China's Road and Aging Population Yining Li, Qiuyun Zhao, Zhiqiang Cheng, 2023-04-03 In the context of global population aging the aging population of China is not only a China specific problem but also a global concern Based on in depth analysis this book focuses on the increasingly serious issue of aging population of China at the present time and explores the possible path and solution from the new type of demographic dividend that is innovation With 15 of the global aging population in the world China has the largest aging population and is aging faster and deeper which produces and profound and far reaching impact on the economic growth social security health care and other related areas **Health Care for an Aging Population** Chris Hackler, 1994-01-01 Pivoting on Daniel Callahan's proposal to withhold publicly funded life prolonging medical care from the very old in his 1989 *Setting Limits Medical Goals in an Aging Society* 14 essays consider the health care crisis looming early in the next century as the baby boomers reach retirement age They discuss the role of the aged in society what the old and young deserve of each other the source of medical cost increases implications of rationing according to age and proposals for a system that will address both immediate problems and long term conditions Annotation copyright by Book News Inc Portland OR *Autonomy and Well-being in the Aging Population* D. J. H. Deeg, C. P. M. Knipscheer, W. van Tilburg, 1993 Population Aging in the United States William J. Serow, David F. Sly, J. Michael Wrigley, 1990-06-26 This incisive work reviews the salient aspects of the demographic social and economic characteristics of the aging of the population of the United States It deals not only with the past and current aspects of population aging but also emphasizes the future outlook with regard to characteristics of the elderly and relative size and composition of the future older population The book begins with a retrospective review of the population aging process of the United States throughout the twentieth century and continues with a prospective view of aging through most of the next century Through the use of 67 tables the authors go on to consider the demographic determinants of population aging and examine the role that each of the three demographic processes has actually played in the shaping of the status quo as well as the roles that they may play in the future Succeeding chapters are devoted to spatial aspects of aging in the United States various social and economic aspects of aging and the older population in the United States economic characteristics of previous current

and future generations of older Americans with a focus on labor force income and educational attainment and health status and patterns of health care utilization among older Americans A final chapter brings all the preceding material together by considering the policy implications of prospective population aging within the United States with reference to both the increased number and proportion of older persons within the American population and to the aging of the older population itself during the next century This reference work is a must for all professionals in demography and gerontology It also deserves close attention by those taking courses in social gerontology and demography

Handbook of Research on Economic and Social Impacts of Population Aging Bayar, Yilmaz, 2021-06-25 The increases in global wealth and the developments in the field of health have led to decreases in mortality rates increases in life expectancy and decreases in fertility rate leading to a population that is rapidly consisting more and more of older individuals The demographic changes affect nearly all parts of society including economics education health social security systems socio cultural activities and more Thus it is essential to study the impacts that an aging population will have on society The Handbook of Research on Economic and Social Impacts of Population Aging analyzes the economic and social impacts of population aging from a multidisciplinary perspective Covering topics such as life expectancy social welfare health social security and more this book is essential for social scientists sociologists demographers economists medical professionals government officials policymakers professionals researchers managers students and academicians looking to understand the effects of an aging population on modern society

Demography of Aging National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on Population, 1994-02-01 As the United States and the rest of the world face the unprecedented challenge of aging populations this volume draws together for the first time state of the art work from the emerging field of the demography of aging The nine chapters written by experts from a variety of disciplines highlight data sources and research approaches results and proposed strategies on a topic with major policy implications for labor forces economic well being health care and the need for social and family supports

Aging Social Policies Robbyn R.

Wacker, Karen A Roberto, 2010-12-07 Due to population explosion and a global increase in average life expectancies an unprecedentedly high percentage of the world's population is aging. By the middle of this century there will be up to 2 billion individuals over the age of 65, a demographic shift never before experienced in our human history. In addition, declining birth rates in industrialized countries means a decrease in the number of adults under 64. In *Aging Social Policies: An International Perspective*, the authors consider how policy, domestic and international, affects and will continue to affect the lives of our aging population.

Global Health and Global Aging Mary Robinson, William Novelli, Clarence E. Pearson, Laurie Norris, 2007-09-24 The book covers the fundamentals of global aging and health and provides real world models from countries and regions that offer the best practices in current approaches. *Global Health and Global Aging* presents information about leadership and governance challenges as well as insights about aging in different cultures and countries in all regions of the world.

Population Aging Donald T. Rowland, 2012-04-26 *Population Aging: The Transformation of Societies* presents an overview and international comparison of the causes, consequences, and policy implications of one of the major processes of change in contemporary societies. It provides a foundation for understanding and reflecting on key demographic and social trends together with related theoretical and policy frameworks that are important in explaining changes and designing informed responses. With particular reference to countries that have the oldest or largest aged populations, the book presents a synthesis of research on population aging, new analyses of trends, and a discussion of the major social policy strategies. Key topics include the new demography of aging, population health, family change, the Third Age, international policy concepts and strategies, and comparisons of countries such as in terms of the relative risks they face from population aging and their resilience as changes occur. Overall, the book presents a broad interdisciplinary perspective on the determinants and consequences of population aging. The book is written for an international audience of policy makers, educators, and practitioners in health and welfare together with students in the social sciences and health sciences. It provides an accessible and academically informed exposition of the field for people engaging with issues arising from population aging in their own country.

Aging Process of Population Edward Rosset, 2017-05-03 *Aging Process of Population* investigates and analyzes the phenomenon of population aging. The text aims to provide a quantitative and qualitative analyses of structural transformations caused by the aging population on modern societies in various parts of the world. The book is organized into four parts. The first part deals with problems in methodologies such as methods to measure demographic old age, hypothetical and perspective computation tools, and deficient methodological uniformity of source materials. The second part discusses the beginning of old age analysis of life tables and the method of computing the normal length of life. Population structure by age in different time periods, dynamics of the changes in the age composition of populations in seven select countries, and the problem of dependency of non-productive elements on the population of productive age are examined in Part III. The last part provides the effect of fertility reduction, mortality, migration, and war.

in the determination of the age structure of populations Demographers sociologists statisticians economists politicians market researchers ecologists and students will find the book invaluable **North Carolina's Older Population** North Carolina Governor's Coordinating Committee on Aging,1960 **Older Americans, Vital Communities** W. Andrew Achenbaum,2007-12-03 This thought provoking work grapples with the vast range of issues associated with the aging population and challenges people of all ages to think more boldly and more creatively about the relationship between older Americans and their communities W Andrew Achenbaum begins by exploring the demographics of our aging society and its effect on employment and markets education health care religion and political action Drawing on history literature and philosophy Achenbaum focuses on the way health care and increases in life expectancy have transformed late life from a phase characterized by illness frailty and debility to one of vitality productivity and spirituality He shows how this transformation of aging is beginning to be felt in programs and policies for aging persons as communities focus more effort on lifelong learning and extensive civic engagement Concerned that his own undergraduate students are too focused on the immediate future Achenbaum encourages young people to consider their place in life s social and chronological trajectory He calls on baby boomers to create institutional structures that promote productive vital growth for the common good and he invites people of all ages to think more boldly about what they will do with the long lives ahead of them
