Aid And Development:

The Development of Aid Gerard Van Bilzen, 2015-01-12 Aid to developing countries started well before World War II but was undertaken as an ad hoc activity or was delivered by private organizations This changed after the War In his Inaugural Address in 1949 the American President Harry Truman announced a bold new programme for making the benefits of our scientific advances and industrial progress available for the improvement and growth of underdeveloped nations the so called Point IV Plan At that time it was thought that this support would be needed only for a limited number of years comparable to the Marshall Plan assistance to Europe But reality proved to be different providing aid was a very long term affair Since the Fifties the aid provided has changed at different occasions In the beginning aid concentrated on constructing infrastructure such as roads railways dams and harbours in order to promote industrial development In the Sixties aid to agriculture was added and in the Seventies aid to social sectors Basic Needs was also provided The Eighties brought worldwide debt problems Major donors applied structural adjustment policies some called this the lost decade d cada perdida The Nineties saw the arrival of the first environmental considerations and asked for attention for the role of women and good governance The form of aid changed from projects to programmes and budget support Describing the different aid forms of the last 65 years and analysing why aid changed from time to time are the subjects of this book Professionals and students in the area of international cooperation will benefit from studying this history as at this moment old concepts are reappearing or applied by new donors like China Is the pendulum really swinging back as Louis Emmerij at one point suggested **Aid** John Degenbol-Martinussen, Poul Engberg-Pedersen, 2003 This is the most comprehensive and up to date analysis of the global aid scene **Development Aid** Péter Tamás Bauer, 1993 Aid and Development Myles A. Wickstead, 2015-06-25 There are many books about aid and development but most of them either assume a good deal of prior knowledge about the subject or are written to make the case for or against aid The first part of this volume is intended to put aid and development into their historical and political context beginning with the post World War Two settlement showing how they have been shaped by that context and in particular by the Cold War and the decolonisation process It shows how the end of the Cold War led to new development priorities and a new aid compact with a much stronger emphasis on issues like governance rights and democratisation beginning with the countries of eastern and central Europe and then more generally It traces the path by which the reduction of poverty has taken centre stage as the key objective of aid and development over the past quarter of a century and looks at priorities for a new set of Sustainable Development Goals that will provide the framework for aid and development efforts for the next 15 years It looks at the shifting balance of global power and suggests ways in which international institutions need to adjust to reflect that balance The second part is a Compendium of key words and concepts mentioned in Part One and further background on some of the major international organisations and institutions with a role in aid and development Aid and Development Ali Brownlie Bojang, 2008 Improvement in communications systems

transport and information highways mean that countries are connected to each other in an increasing number of ways This series investigates the effects of globalisation on key international issues For ages 12 *Aid Or Development* Willem Gustaaf Zeylstra,1977 **Aid and Development** John Overton,Warwick E. Murray,2020-10-06 This book provides an overview of what aid is how it has changed over time and how it is practiced as well as debates about whether aid works for whom and what its future might be The text shows how aid is a contested and fluid concept that involves a wide and changing variety of policies actors and impacts It equips the reader with an understanding of what aid is where it comes from and where it goes how it is delivered and what its impacts are and whether shortcomings are a result of a fundamental problem with aid or merely the result of bad practices It explores the changing political ideologies and conceptions of development that continually reshape how aid is defined implemented and assessed and how despite a global commitment to the Sustainable Development Goals we are at a point where the very notion of aid is being questioned and its future is uncertain Each chapter includes case studies chapter summaries discussions weblinks and further reading to help strengthen the reader s understanding Aid and Development provides an important resource for students development workers and policy makers seeking an understanding of how aid works [International Development Assistance](#) Olav Stokke,2019-03-08 This book provides a comprehensive search for the basic political drivers of international development cooperation based on the policy and performance of the OECD countries from the early 1960s to the present The author focuses on the stated and implemented policies of the four so called frontrunners and the Western hegemon scrutinizing the changing trends in the justifications objectives and guidelines set for the policy and their evolving performance vis vis the international ODA target Through extensive research the work examines predominant world views societal value systems and foreign policy traditions in order to find the policy drivers that vary nation to nation and how development assistance has evolved globally [How the Aid Industry Works](#) Arjan de Haan,2009 Why is aid contested The aid industry defined How the thinking about aid and international development has evolved Development projects rationale and critique Hard nosed development reforms adjustment governance Country led approaches and donor coordination can the aid industry let go Development s poor cousins environment gender participation rights How does the industry knows what works and what doesn t Challenges for the 21st century *Foreign Aid for Development* George Mavrotas,2010-02-25 Foreign aid is one of the few topics in the development discourse with such an uninterrupted yet volatile history in terms of interest and attention from academics policymakers and practitioners alike Does aid work in promoting growth and reducing poverty in the developing world Will a new big push approach accelerate progress towards the Millennium Development Goals or will another opportunity be missed Can the lessons of almost half a century of aid giving be learnt These are truly important questions in view of the emerging new landscape in foreign aid and recent developments related to the global financial crisis which are expected to have far reaching implications for both donors and recipients engaged in this area Against this shifting aid landscape there is

a pressing need to evaluate progress to date and shed new light on emerging issues and agendas This volume brings together leading aid experts to review the progress achieved so far identify the challenges ahead and discuss the emerging policy agenda in foreign aid A central conclusion of this important and timely volume is that since development aid remains crucial for many developing countries a huge effort is needed from both donors and aid recipients to overcome the inefficiencies and make aid work better for poor people After all as global citizens we have a moral obligation to do the best we can to lift people out of poverty in the developing world The findings of this book will be of considerable interest to professionals and policymakers engaged in policy reforms in foreign aid and provide an essential one stop reference for students of

Mallett, 2012-12-18 Sumner and Mallett review the literature on aid in light of shifts in the aid system and the increasing concentration of the world's poor in middle income countries As a consequence they propose a series of practical policy relevant options for future development cooperation with the aim of provoking discussion and informing policy

Aid Or Development Willem Gustaaf Zeylstra, 1975 Monograph on theoretical and philosophical approaches to the role of developed countries in extending development aid to developing countries maintains that aid programmes operate on the basis of a concept of economic development which demands Western style modernization and acculturation and comments on underdevelopment etc

References Assessing Aid, 1998 Assessing Aid determines that the effectiveness of aid is not decided by the amount received but rather the institutional and policy environment into which it is accepted It examines how development assistance can be more effective at reducing global poverty and gives five main recommendations for making aid more effective targeting financial aid to poor countries with good policies and strong economic management providing policy based aid to demonstrated reformers using simpler instruments to transfer resources to countries with sound management focusing projects on creating and transmitting knowledge and capacity and rethinking the internal incentives of aid agencies
