An Atlas of Typeforms. [With a Folding Plate.]. James SUTTON (and BARTRAM (Alan)), Alan Bartram, 1968 **An Atlas of Typeforms** James Sutton, Alan Bartram, 1968 **An Atlas of Typeforms** , 1968 **Typeforms** Alan Bartram, 2007

This book is the long awaited successor to the classic *An Atlas of Typeforms* the great visually led history of type that Alan Bartram and James Sutton produced in 1968 Much has changed in the last 40 years not least the teaching of typography and the means by which it is created Because current design methods do not require the drawing and tracing of letterforms in order to produce layouts we have lost our close connection with them Few understand their history their appearance how and why they have developed as they have Nearly 75 different types are shown in their original metal forms just as they were in the *Atlas of Typeforms* But an entirely new feature is the author s attempt to place the types in their historical context By including photographs of contemporary inscriptions on buildings and monuments Alan Bartram explores the relationship between printed and architectural letterforms and their parallel course from the Renaissance until Victorian times The opportunities offered for graphic and type designers in the digital age are greater than ever before But without an understanding of the visual structure of letterforms and some knowledge of their fascinating history designers cannot fully exploit the potential of type In this book the author Bartram educates us in these critical areas
