Microsoft Office Automation with Visual FoxPro Tamar E. Granor,Della Martin,2000 Visual FoxPro developers are used to building large complex applications using only VFP as their programming environment But Windows users are demanding more integration with other applications such as the Microsoft Office suite Word Excel PowerPoint and Outlook Visual FoxPro can be used to automate either visually or behind the scenes any task or process that you could do manually in Office plus much more In Microsoft Office Automation with Visual FoxPro you ll learn how to create powerful applications that span the entire Office suite using Visual FoxPro in the driver s seat **Office Automation** D. Tschritzis,2012-12-06 The term Office Automation implies much and means little The word Office is usually reserved for units in an organization that have a rather general function They are supposed to support different activities but it is notoriously difficult to determine what an office is supposed to do Automation in this loose context may mean many different things At one extreme it is nothing more than giving people better tools than typewriters and telephones with which to do their work more efficiently and effectively At the opposite extreme it implies the replacement of people by machines which perform office procedures automatically In this book we will take the approach that Office Automation is much more than just better tools but falls significantly short of replacing every person in an office It may reduce the need for clerks it may take over some secretarial functions and it may lessen the dependence of principals on support personnel Office Automation will change the

office environment It will eliminate the more mundane and well understood functions and will highlight the decision oriented activities in an office The goal of this book is to provide some understanding of office activities and to evaluate the potential of Office Information Systems for office procedure automation To achieve this goal we need to explore concepts elaborate on techniques and outline tools
