Blind Bombing Norman Fine, 2019-12-01 Silver Medal winner in the Independent Book Publishers Awards Late in 1939 Nazi Germany was poised to overrun Europe and extend Adolf Hitler s fascist control At the same time however two British physicists invented the resonant cavity magnetron About the size of a hockey puck it unlocked the enormous potential of radar exclusively for the Allies Since the discovery of radar early in the twentieth century development across most of the world had progressed only incrementally Germany and Japan had radar as well but in just three years the Allies new radar incorporating the top secret cavity magnetron turned the tide of war from doubtful to a known conclusion before the enemy even figured out how The tactical difference between the enemy s primitive radar and the Allies new radar was similar to

that between a musket and a rifle The cavity magnetron proved to be the single most influential new invention contributing to winning the war in Europe Norman Fine tells the relatively unknown story of radar s transformation from a technical curiosity to a previously unimaginable offensive weapon We meet scientists and warriors critical to the story of radar and its pressure filled development and implementation Blind Bombing brings to light two characters who played an integral role in the story as it unfolded one a brilliant and opinionated scientist the other an easygoing twenty one year old caught up in the peacetime draft This unlikely pair and a handful of their cohorts pioneered a revolution in warfare They formulated new offensive tactics by trying failing and persevering ultimately overcoming the naysayers and obstructionists on their own side and finally the enemy For more information about Blind Bombing visit millwoodhouse com **BOMB** Betsy Sussler,2014 Drawing on 30 years of BOMB Magazine this anthology of interviews brings together some of the greatest figures of world literature for a brilliant and unforgettable collection of sharp insightful and intimate author conversations Enjoy a conversation with Salman Rushdie in hiding after the fatwa issued by Ayatollah Khomeini and with Jonathan Franzen still an unknown author on the eve of the publication of The Corrections Harper Perennial 2001 BOMB brings together some of the greatest figures of world literature for an unforgettable collection *Too Queer* Victoria A. Crane,1993 As the might and capabilities of American airpower have grown during the last 60 years so has the controversy about its use in the intentional and indiscriminate wartime bombardment of civilians In Bombs Cities and Civilians Conrad Crane maintains that for the most part American airmen in World War II remained committed to precision bombing doctrine Instead of attacking densely populated urban areas simply to erode civilian morale Army Air Forces adhered to a policy that emphasised targeting key industrial and military sites He demonstates that while the British Germans and Japanese routinely conducted indiscriminate aerial bombardment of enemy cities American airmen consistently stayed with daylight raids against carefully selected targets especially in Europe Daytime precision missions were usually far more dangerous than night area attacks but such Army Air Forces tactics increased bombing efficiency and also reduced the risk of civilian casualties *Sightlines* ,1981 *Speak Fiction and Poetry!* Betsy Sussler,Suzan Sherman,Ronalde Shavers,1998 This text presents an anthology of BOMB magazine s interviews with writers The writers featured include Walter Mosley Russell Banks Jeanette Winterson Paul Auster Michael Ondaatje Graham Swift Peter Carey Caryl Phillips Willem Dafoe Sheila Bosworth and Padgett Powell **WW2** ,1972
