Islamic Heritage Architecture IV S. Hernandez, 2022-09-13 Islamic architecture has enriched design with a wide variety of structural shapes including among others unique arches a wide variety of vaults and domes which allow for new forms to be developed This volume deals with the design of many types of buildings in Islamic countries including not only the better known public buildings like mosques mausoleums citadels and forts but also houses and gardens engineering works such as bridges and dams irrigation systems and many others which have also had a profound impact on society There is much to learn from past experiences to arrive at solutions that are environmentally sound and sustainable in the long term As conventional energy resources become scarce the Islamic design heritage can offer invaluable lessons on how to deal in an efficient manner with cases of hard and extreme environments Traditional architecture and urban environments in most Islamic countries are now being eroded by overemphasis on a global type of architecture and city planning Consequently many regions are losing their identity The included research reviews these developments in the light of what the classical Islamic urban designs and architectures have to offer modern society *Journal, Royal Architectural Institute of Canada*
