**Trekking in the Caucasus** Urii Kolomiets, Aleksey Solov'ev, 1994 Now that the former Soviet Union is open to Western walkers and climbers many are taking the opportunity to visit the fabled Caucasus, the highest mountains in Europe. British climbers knew the area a century ago and unlike the Alps the changes have been minimal. 62 walks are described. Some need simple climbing skills but most are straightforward. In addition two routes are described to the tops of Elbruz, the highest mountain in Europe. This is the first modern book of its kind by Russian authors. There are some very easy routes across the Main Range following good wide paths but the fact is that the central part from the Klukhor to Mamison'sky passes cannot offer such a boon. It does not mean you have to climb to get over the Range but you should not expect a comfortable path up to the saddle and you have to be ready for scree, grass and snow slopes. Not a big hardship considering the reward in calm and seclusion so rare nowadays. **Fodor's The Himalayan Countries** Kathleen Cox, 1990 **The Good Alternative Travel Guide** Mark Mann, Zainem Ibrahim, 2002 First Published in 2002. Routledge is an imprint of Taylor Francis, an information company. **Himāl**, 2000 **Nepal National Union Catalogue** Bhanu Pathak, Damodar Adhikari, 1997 *Trekking in the Everest Region* Jamie McGuinness, 1993 **Annapurna** Kev Reynolds, 1993 Seen from the lakeside town of Pokhara in central Nepal a tremendous wall of snow and ice capped mountains dominates the northern horizon. The Annapurna Himal with no less than twelve summits topping 7000 metres (23 000ft) soaring above a foreground of intricately terraced foothills, this is one of the most beautiful and ethnically diverse landscapes on earth. Around this island block goes the route of the classic Annapurna Circuit, one of the great walks of the world. Into the heart of these mountains another trekker's trail leads to the Annapurna Sanctuary. **Walking in the High Tatras (Slovakia and Poland)** Colin Saunders, Renáta Nárožná, 1994 The High Tatras is a range of granite and gneiss mountains between Poland and Slovakia. 500 rocky summits, 100 of which exceed 2000m in height. Gerlach 2655m. The ridges are narrow and full of gendarmes and look formidable yet as you draw closer you discern the valleys which separate the peaks and realise there are ways through. A network of waymarked paths connects peaks, lakes and mountain huts. Many are simple walks but some are exposed via ferrata type scrambles. With the collapse of the Eastern Bloc access is now a simple matter and is fully described in the book as are all major centres on both sides of the

border and a comprehensive selection from the easiest to the hardest Despite its title the book also includes the slate peaks of Western Tatras and limestone peaks of the White Tatras as well as the High Tatras
