Adventures In Spacetime:

An Adventure in English Language Space George Takahashi, 2016-07-19 George Takahashi's *An Adventure in English Language Space* A Key to the Mysteries of Prepositions goes beyond the basic dos and don'ts of English grammar into contextual space. He defines dimensional relationships of words to their meanings and proper usage to help native and non-native speakers of English grasp the layers of possibilities beneath the often ambiguous sound and sense method of approach to the English language. He finds discrepancies between other authoritative dictionaries and puts as many myths to rest in tangible explanations of how the structure of language in and around prepositions can be straightforward and comprehensible. Takahashi's *An Adventure in English Language Space* is for everyone from scholars to anyone who is curious about the sense and meaning of English prepositions.

Design Theory, Language and Architectural Space in Lewis Carroll Caroline Dionne, 2023-07-31 This volume offers spatial theories of the emergent based on a careful close reading of the complete works of nineteenth-century writer and mathematician Lewis Carroll, from his nonsense fiction to his work on logic and geometry, including his two short pamphlets on architecture. Drawing on selected key moments in our philosophical tradition, including phenomenology and sociospatial theories, Caroline Dionne interrogates the relationship between words and spaces, highlighting the crucial role of language in processes of placemaking. Through an interdisciplinary method that relates literary and language theories to theories of space and placemaking, with emphasis on the social and political experience of architectural spaces, Dionne investigates Carroll's most famous children's books, *Alice's Adventures in Wonderland* and *Through the Looking Glass*, and *What Alice Found There*, in relation to his lesser-known publications on geometry and architecture. The book will be of interest to scholars working in design theory, design history, architecture, and literary theory and criticism.

Inventing the Novel R. Bracht Branham, 2019-11-07 *Inventing the Novel* uses the work of the Russian philosopher Mikhail Bakhtin (1895-1975) to explore the ancient origins of the modern novel. The analysis focuses on one of the most elusive works of classical antiquity, the *Satyrica*, written by Nero's courtier Petronius Arbiter, whose singular suicide, described by Tacitus, is as famous as his novel. Petronius was the most lauded ancient novelist of the twentieth century, and the *Satyrica* served as the original model for F. Scott Fitzgerald's *The Great Gatsby* (1925) as well as

providing the epigraph for T S Eliot's *The Waste Land* 1922 and the basis for Fellini's *Satyricon* 1969 Bakhtin's work on the novel was deeply informed by his philosophical views if as a phenomenologist he is a philosopher of consciousness as a student of the novel he is a philosopher of the history of consciousness and it is the role of the novel in this history that held his attention This volume seeks to lay out an argument in four parts that supports Bakhtin's sweeping assertion that the *Satyricon* plays an immense role in the history of the novel beginning in Chapter 1 with his equally striking claim that the novel originates as a new way of representing time and proceeding to the question of polyphony in Petronius and the ancient novel

Space, Time, and Deity Samuel Alexander, 1920 The Book of Time Gerald Lynton Kaufman, 1938 **The Adventure of Science** Benjamin Ginzburg, 1930 **The Software Encyclopedia**, 1988 **The Monist** Paul Carus, 1927 Vols 2 and 5 include appendices **Space, Time and Gravitation** Sir Arthur Stanley Eddington, 1920

Religion and Reality Darren Iammarino, 2013-08-28 This book argues for the reality of multiple religious ultimates rather than just one This entails that all the religions are not the same they describe different religious objects and they each provide unique forms of salvation The immediate advantage of this approach is that it explains how all religions are equally valid without glossing over the real differences that define them Put differently each religion has correctly identified a piece of the puzzle that makes up Ultimate Reality There is however a limit to the plurality and thus five distinct religious ultimates are identified the Forms God A World Creativity and the Receptacle One or two of these five ultimates are found within all of the world's religions as evidenced by religious scriptures and religious experiences Based upon these five religious ultimates this book puts forth a novel philosophical and religious system cosmopsyntheism a word emphasizing the likelihood that in the beginning there was more than just God Quite possibly there may have been five ultimates each sacred in its own way none of which could have existed without the reality of the others **A Handbook of Science Fiction and Fantasy**, 1959
