***Sacred Worlds*** Chris Park, 2002-11-01 This book the first in the field for two decades looks at the relationships between geography and religion It represents a synthesis of research by geographers of many countries mainly since the 1960s No previous book has tackled this emerging field from such a broad interdisciplinary perspective and never before have such a variety of detailed case studies been pulled together in so comparative or illuminating a way Examples and case studies have been drawn from all the major world religions and from all continents from both a historical and contemporary perspective Major themes covered in the book include the distribution of religion and the processes by which religion and religious ideas spread through space and time Some of the important links between religion and population are also explored A great deal of attention is focused on the visible
