Facts and Myths Facing Today's World John Durbin Husher,2008 The author provides facts and myths concerning global warming as well as a detailed discussion of DNA and its affects on a person s genetics He brings forth the fantasies surrounding HIV and AIDS and frees the reader s mind from any fear concerning these afflictions The reader is introduced to the human genome and stem cells with their promises for the near future He details how global warming is a normal cycle that our Earth has followed and is not due to atmospheric carbon dioxide He insists the Earth will have a cooling period near the turn of the century that will cause more concern than the warming cycle we are experiencing Each of the subjects is presented in a novel manner that the layman will find entertaining The Oxford Handbook of Early Modern European History, 1350-1750 Hamish M. Scott,2015 This Handbook re examines the concept of early modern history in a European and global context The term early modern has been familiar especially in Anglophone scholarship for four decades and is securely established in teaching research and scholarly publishing More recently however the unity implied in the notion has fragmented while the usefulness and even the validity of the term and the historical periodisation which it incorporates have been questioned The Oxford Handbook of Early Modern European History 1350 1750 provides an account of the development of the subject during the past half century but primarily offers an integrated and comprehensive survey of present knowledge together with some suggestions as to how the field is developing It aims both to interrogate the notion of early modernity itself and to survey early modern Europe as an established field of study The overriding aim will be to establish that early modern is not simply a chronological label but possesses a substantive integrity Volume I examines Peoples and Place assessing structural factors such as climate printing and the revolution in information social and economic developments and religion including chapters on Orthodoxy Judaism and Islam Technical Bulletin Michigan State University.
