

DOT AND CROSS PRODUCT.

For problem 1-5 find the vector component of 'v' along 'b' and the vector component of v orthogonal to b.

1. $v = 2i - j$, $b = 3i + 4j$

Solution:

Vector component of v along b

$$= \frac{v \cdot b}{\|b\|}$$

$$\|b\| = \left(\sqrt{(3)^2 + (4)^2} \right) = \sqrt{9+16}$$

$$\|b\| = 5$$

so,

$$= \frac{[(2i - j) \cdot (3i + 4j)] (3i + 4j)}{\|b\|^2}$$

$$= \frac{(6 - 4)(3i + 4j)}{25}$$

$$= \frac{(2)(3i + 4j)}{25}$$

$$= \frac{6i + 8j}{25}$$

$$\langle 6, 8 \rangle \Rightarrow \left\langle \frac{6i}{25} + \frac{8j}{25} \right\rangle$$

Vector component of v orthogonal to b

$$= v - \text{Proj}_b v$$

$$= (2i - j) - \left(\frac{6i}{25} + \frac{8j}{25} \right)$$

$$= \frac{50i}{25} - \frac{6i}{25} + \left(\frac{-25j}{25} + \frac{8j}{25} \right)$$

$$= \left(\frac{50i - 6i}{25} \right) + \left(\frac{-25j + 8j}{25} \right)$$

$$\left\langle \frac{44i}{25} - \frac{33j}{25} \right\rangle$$

Order and Chaos in Nonlinear Physical Systems Stig Lundqvist, Norman H. March, Mario P. Tosi,2013-11-11 This volume is concerned with the theoretical description of patterns and instabilities and their relevance to physics chemistry and biology More specifically the theme of the work is the theory of nonlinear physical systems with emphasis on the mechanisms leading to the appearance of regular patterns of ordered behavior and chaotic patterns of stochastic behavior The aim is to present basic concepts and current problems from a variety of points of view In spite of the emphasis on concepts some effort has been made to bring together experimental observations and theoretical mechanisms to provide a basic understanding of the aspects of the behavior of nonlinear systems which have a measure of generality Chaos theory has become a real challenge to physicists with very different interests and also in many other disciplines of which astronomy chemistry medicine meteorology economics and social theory are already embraced at the time of writing The study of chaos related phenomena has a truly interdisciplinary character and makes use of important concepts and methods from other disciplines As one important example for the description of chaotic structures the branch of mathematics called fractal geometry associated particularly with the name of Mandelbrot has proved invaluable For the discussion of the richness of ordered structures which appear one relies on the theory of pattern recognition It is relevant to mention that to date computer studies have greatly aided the analysis of theoretical models describing chaos

Trends in Mathematical Optimization K.H. Hoffmann,2013-03-07 This volume contains a collection of 23 papers presented at the 4th French German Conference on Optimization held at Irsee April 21-26 1986 The conference was attended by ninety scientists about one third from France from Germany and from third countries each They all contributed to a highly interesting and stimulating meeting The scientific program consisted of four survey lectures of a more tutorial character and of 61 contributed papers covering almost all areas of optimization In addition two informal evening sessions and a plenary discussion on further developments of optimization theory were organized One of the main aims of the organizers was to indicate and to stress the increasing importance of optimization methods for almost all areas of science and for a fast growing number of industry branches We hope that the conference approached this goal in a certain degree and managed to continue fruitful discussions between

theory and applications Equally important to the official contributions and lectures is the nonmeasurable part of activities inherent in such a scientific meeting Here the charming and inspiring atmosphere of a place like Irsee helped to establish numerous new contacts between the participants and to deepen already existing ones The conference was sponsored by the Bayerische Kultusministerium the Deutsche Forschungsgemeinschaft and the Universities of Augsburg and Bayreuth Their interest in the meeting and their assistance is gratefully acknowledged We would like to thank the authors for their contributions and the referees for their helpful comments
