Biomedical Politics Institute of Medicine, Division of Health Sciences Policy, Committee to Study Decision Making, 1991-02-01 The abortifacient RU 486 was born in the laboratory but its history has been shaped by legislators corporate marketing executives and protesters on both sides of the abortion debate This volume explores how society decides what to do when discoveries such as RU 486 raise complex and emotional policy issues Six case studies with insightful commentary offer a revealing look at the interplay of scientists interest groups the U S Congress federal agencies and the public in determining biomedical public policy and suggest how decision making might become more reasoned and productive in the future The studies are fascinating and highly readable accounts of the personal interactions behind the headlines They cover dideoxyinosine ddI RU 486 Medicare coverage for victims of chronic kidney failure the human genome project fetal tissue transplantation and the 1975 Asilomar conference on recombinant DNA **Science, Money, and Politics** Daniel S. Greenberg, 2003-04-15 Greenberg explores how scientific research is funded in the United States including why the political process distributes the funds the way it does and how it can be corrupted by special interests in academia business and political machines **Vitality Politics** Stephen Knadler, 2019-08-06 Vitality Politics focuses on a slow racial violence against African Americans through everyday accumulative contagious and toxic attritions on health The book engages with recent critical disability studies scholarship to recognize that debility or the targeted maiming and distressing of Black populations is a largely unacknowledged strategy of the U S liberal multicultural capitalist state This politicization of biological health serves as an instrument for insisting on a racial state of exception in which African Americans own unhealthy habits and disease susceptibility justifies their legitimate suspension from full rights to social justice economic opportunity and political freedom and equality The book brings together disability studies Black Studies and African American literary history as it highlights the urgent need and gives weight to a biopolitics of debilitation and medicalization to better understand how Black lives are made not to matter in our supposedly race neutral multicultural democracy **The Legislative Politics of Appropriations for Biomedical Research** Richard Clarke Weston, 1994 Gender, Race and the National Education Association Wayne J. Urban, 2020-08-26 Urban presents the NEA in its historical context turning a fair and clear eye on this powerful and controversial organization and using this context to both criticize and commend The culmination of a three decade long study this unique volume presents an unusually thorough and much needed holistic view of the NEA Politics and the Life Sciences, 1993 **Health Politics and Policy** Theodor J. Litman, Leonard S. Robins, 1991 This book in its third edition offers readers a comprehensive and analytical overview of the historic and contemporary involvement of government and politics in The development of health policy Chapters are organized around four major areas The first places health politics and policy within a historical social and economic perspective Part two focuses on an exploration of the interface between health policy and the political structure Part three covers the role of

public opinion and health interest groups in the formulation of health policy Part four explores the relationship of health policy and the political process in the areas of health care finance access to health care and health care reform as well as mental disability and environmental health

**The Ethical Dimensions of the Biological Sciences** Ruth Ellen Bulger, 1993-05-28 This is the first systematically organised anthology on responsible conduct in scientific research aimed at students and practising researchers in the biological sciences It has been designed in response to the increasing concern to teach graduate students about ethical issues in the biological sciences The book contains classic essays and other published material and is carefully structured to explore a range of subjects the qualifications for authorship plagiarism the use of human beings and animals in research the norms of ethical conduct in science scientific honesty and its relationship to gullibility and self deception ethical issues in laboratory work the relation between science and society the ethics of teaching and learning The volume also provides insights into issues often not formally considered in graduate science education such as methods of scientific investigation scientific paradigms and the creative process

**Morality Politics in American Cities** Elaine B. Sharp, Yvette M. Alex-Assensoh, 2005 Topless bars casino gambling needle exchange programs for drug addicts there s no question morality issues remain front and center in urban politics Presenting a systematic analysis of culture war issues at the local level Elaine Sharp shows how American cities deal with these ongoing concerns Drawing on a sample of ten strategically chosen cities she explains differences in how municipalities respond to controversies surrounding sex business abortion clinics legalized gambling gay rights and drug use By analyzing the relative importance of subculture economics and institutional arrangements in the disputes she points the way toward richer and more complete understanding of how different cities respond differently to these hot button issues Far more than a statistical study *Morality Politics in American Cities* is a collection of fascinating stories of real people grappling with down to earth issues and real life drama richly informative case studies that will captivate students and interested citizens alike Mayors public health directors activists and others speak their minds about the pros and cons of these controversies Here are officials in one city confronting the Vatican over funding for abortion services those in another battling a local university over its refusal to provide health benefits to gay partners of faculty members and still others mounting a massive community sponsored attack on topless clubs These stories provide detailed evidence to support classifications needed for comparing cities experience with each of the five morality issues They also corroborate inferences drawn from the comparisons by showing what considerations were in play as local officials grappled with these issues Overall the study shows that cultural factors usually dominate policymaking in local politics except when specific economic interests are at stake and also observes that county level governments are more important than previously thought in terms of morality issue decisions As provocative as it is informative *Morality Politics in American Cities* demonstrates that such issues same sex marriage for example are multidimensional and often difficult to resolve Its conclusions however contingent mark an important step in the ongoing

process of understanding important differences in approaches to these issues and clearly show how moral conflicts continue to define American politics

**Breast Cancer Risk and the Politics of Prevention** Jennifer Ruth Fosket, 2002 Bodies and Politics, 2002

**Politics, Science, and Dread Disease** Stephen Parks Strickland, 1972 In this first historical analysis of national policy in biomedical research Mr Strickland examines the rise of the National Institutes of Health tells of the recurrent struggle between elected public officials and science administrators over the pace and direction of cancer and heart disease research analyzes the roles that key members of Congress have played in the development of medical research and discusses the medical research lobby and its founder Mrs Albert D Lasker Book jacket

*On Feminist Ethics and Politics* Claudia Card, 1999 For years mainstream feminist ethics focused criticism on male supremacy Feminist philosophers in this volume adopt a less male focused stance to look closely at oppression s impact on women s agency and on women s relations with women Examining legal social and physical relationships these philosophers confront moral ambiguity moral compromise and complicity in perpetuating oppression Combining personal experience with philosophical inquiry they vividly portray their daily engagement with oppression as both victims and perpetrators They explore such issues as how pornography silences women and radical feminist politics complicity in racism Among these insightful essays Sandra Bartky argues that women share guilt for racism when they benefit from it without protest Susan Brison reflects on uses of narrative in trauma recovery from such experiences as being targeted for rape or murder Joan Callahan examines fallout of derogatory speech directed at lesbians Virginia Held proposes carrying care into marketplaces and governments and in her introduction Claudia Card draws on Primo Levi s conception of gray zones in exploring dangers of character damage to victims of misogyny A fitting companion to Card s highly regarded *Feminist Ethics* this volume interweaves observations on character political ethics violence and love into an accessible sourcebook for students It tackles some of feminism s most pressing issues and helps readers to identify and then overcome the real damage caused by oppression

**Science, Politics, .....and Me** Dr Ian Gibson, 2017-03-05 Few diseases can have been so maligned by false information so manipulated by an insidious establishment controlled ideology or so poorly dealt with by those holding the purse strings for research into the disease than Myalgic Encephalomyelitis ME This book examines a scandal in our generation a scandal still being played out by corrupt apathetic inept or ignorant attitudes in governments and Medical Research Councils and health services One of the authors Dr Ian Gibson in his Retirement has written this book with

a political friend Elaine Sherriffs Ian Gibson has a passing interest in the current political scene across the world and regularly speaks on these issues When it comes to universal health he has pointed out on many occasions that governments often ignore scientific evidence ME as described in the book is a major problem where evidence is relegated to psychiatric explanations It is a desperate need for scientists as far as health issues are concerned to look for biomedical evidence and ME is a major example This book describes the political manoeuvring which features just like those in the TV programme The House of Cards in the USA the UK which described the games that are played in both parliaments He has previously addressed these problems in an early book in 1981 called Class Health Profit Ian and Elaine have penetrated the murky world of politics which features in the world of ME It is long past the time to treat this as a serious illness and the need for serious biomedical research This will only come about when politicians and the media stop trivialising the illness Science Politics and ME is a book which will serve as a reference for the dark times when patients were ill served by the clash of interests between truths and untruths It is also a book which comes at a time where a brighter future may be in the making for people with ME and their families
