Riggs,2004 First Published in 2004 Routledge is an imprint of Taylor Francis an informa company **The Little Giant Book of Science Facts** Glen Vecchione,2004 Hundreds of fascinating flabbergasting and sometimes freaky facts are at your disposal in this fun sized compendium Uncover animal oddities including the fact that certain species of frogs can survive being frozen solid and thawed Find out how strange people really are Did you know that the average human produces 25 000 quarts of saliva in a lifetime enough to fill two swimming pools And there are botanical surprises such as that bananas are actually herbs plus science tidbits about the Earth inventions computers and more *CyberWisdom* John Bajak,2011-03-28 Cyber Wisdom is philosophy of computing All it takes says its thesis is to be satisfied But how that satisfaction is accomplished is difficult That is why when the computer is the mind amplifier the resonance of the satisfaction builds greatest when only a little time is given Cyber Wisdom is computer satisfaction to the user without any physical specific machine to run with Its philosophy is like a medicine upon withdrawal from physical use of computing machines That medicine will come to be satisfaction wellness and resonance inside the intense emotional need to know the wisdom of the machine But enough of what Cyber Wisdom is Just what is it all about People pay a lot of money for cups which come with water as part of the deal But to get more water people have to buy a whole other cup to get the water more Cups get bigger nicer better and they come with water But they drink it then they have to buy a whole other cup to get water again People are thirsty but they have to buy the cup to get the water inside But all of a sudden there is a well No matter how cheap or expensive the cup water is cheap and plentiful This is bad for they who make cups People don t need to buy the latest and greatest But it is very good business for they who tend the well telling the cup owners you don t need the bigger and better cup it is the water you want anyway The water itself is free it has always been free just now it is available to all This just means that for most people the idea of the computer looms larger than knowing the computer itself That computers became popular not because people were told the wisdom of the machine they saw themselves in the image of the machine People s minds would profit from the mind amplification that computers did The power of the computer priests kept the love of the amplified mind together in computing systems witness IBM And the coordination where each cup carrying more and more water is communicated to more and more people happened witness Steve Jobs or Bill Gates building successful cups But people still wanted water there was Google and the internet So now people are wanting meaning in their lives Facebook is the current thought and Twitter searches for the now But philosophy of computing watches at what is permanent in the computing game What is it about mind amplification that is real and fascinating and keeps us permanently at the keyboard of

life People are beginning to realize that loudness is not the only thing to listen to That water though frozen will contain itself there is that cup Although cups are necessary it is not necessary for time to run so quick for healing resonance recovery from all the interruptions that pass through life Water is the randomness that the mind needs to have to function and flourish well Randomness is as essential to the mind as reality is necessary to the body Don t be too loud you can t listen The water is the blood and the spirit that witnesses Where what the computer is it is the reflection of what it hears And each person makes the choice themselves often from what the person knows to the path before them Cyber Wisdom will help a great deal for each person to make the wise choice on how to deal with computers in their lives Complexity is where you find it It is not too late to change and it is not too late to stay the same
